DAHLIA FLOWERED ZINNIAS

STECKLER Seed Company, INC.

512-516 Gravier Street
NEW ORLEANS 3, LOUISIANA
The brilliant colored leaves that these bulbs produce is unequaled in the summer garden, also used extensively in pot plantings. These bulbs should be given very good drainage.

**Candidum.** Fine Easter variety and very popular. Leaf snow-white with green veins and network; narrow green border.

**Crimson Wave.** New, large, deep green leaf with crinkled, transparent crimson or scarlet center and many crimson spots toward edge. Strong grower.

**Fire Nymph.** Tall and strong grower, mottled with two shades each of bright pink and straw color.

**Lord Derby.** Transparent rose with dark green ribs and narrow edge. Very popular.

**Mrs. W. B. Haldeman.** Medium leaf of bright pink and narrow green edge. Very fine and popular.

**Itacapus.** Dark red leaf; narrow border with red dottings. One of the most beautiful.

**Pink Cloud.** New. Large, crinkly, well-opened leaves of mottled pink with a cloud-like effect.

**Red Star.** Deep carmine with heavy scarlet ribs and narrow green edge. Extra fine.

**Spangled Banner.** Glowing red leaf with darker ribs and a profusion of pink spots.

**Texas Wonder.** Mottled crimson center with pink and green blotches, veins white and yellow.
“DUSTLESS” DIELDRIN CONTROLS MANY TURF, LAWN, SOIL INSECTS THE EASY WAY

GRANULAR DIELDRIN pours right from the specially designed box, no blowing dust. In granular form, it broadcasts easily like clover seed, and settles right to the surface of the soil. Most economical, one pound treats 700 square feet of area.

CONTROLS INSECTS ON LAWNS—pests such as ants, pillbugs or sowbugs, mole crickets, earwigs, slugs and snails. Controls the “lawn rank” larvae that damage grasses— including sod webworms, armyworms, striped grass worms and lawn chinch bugs. Also white grubs and grubs of Japanese beetles, Asiatic garden beetles, green June beetles, northerm masked chafer, and European chafer, some of which also attack the roots of grasses. Use a very light and uniform application, making sure that protected hiding places are treated. Sprinkle lawns thoroughly after treatment.

CONTROLS INSECTS IN FLOWER GARDENS—soil inhabiting pests listed above, also autworms, and root maggots, can be controlled in flower garden soils by broadcasting, working into the soil.

SIZE AND RETAIL PRICE
1 lb. ........................................... $1.89
4 lb. ............................................. 2.98

CRAG HERBICIDE—1

Especially recommended for strawberries. As soon as you spray or sprinkle the solution on the ground it becomes a chemical that kills germinating seeds and seedlings that are starting to sprout in the upper soil layer. For this reason, it will not kill established weeds and should be used on newly cultivated soil. It will not injure plants with deep root systems.

Postpaid, 4 oz. can $1.75.
Not postpaid, 4 ozs. $1.50.

The soluble plant food concentrate for foliage or root feeding

GRO-STUF

Try this on your indoor and outdoor plants. Gro-Stuf is a complete 20-20-20 plant food containing equal amounts of nitrogen, phosphoric acid and potash, plus hormones and trace elements. Just follow easy directions on the label. Apply with garden sprayer or watering can on grass, flowers, vegetables, shrubs—even trees. A miracle starting solution for bare-root rose bushes.

IN AIRTIGHT CANS
5 oz. ........................................... $1.49
1 lb. ............................................ 1.85
4 lb. ............................................ 3.75

“No-SEED” BLOSSOM-SET

“No-Seed Blossom Set” is a popular liquid hormone spray for Tomatoes, Strawberries, Cucumbers and other crops. Makes Tomatoes ripen 1 to 3 weeks earlier, stopping blossom drop.
4 oz. $0.75 each; 1 pint. $1.75 each.
12 oz. Aerosol (for 100 plants) $1.79 each.

BERRY-SET

Makes berries grow much larger—often 50% to 100%. Easier—better—sweeter—more luscious tasting. Increases berry yields greatly. Just mix powder with water and spray the open blossoms. One packet enough for several hundred plants.

1/2 oz. $0.25 each; 3 oz. $1.00 each.

FRANCIS WALL NAILS

For training and supporting vines, etc. on brick, stucco, stone and cement walls without defacing.
Price 8c per box of 18.

MOIST-SHRUB PLANTRAY

Unbreakable Flower Pot Saucers—Replace fragile dishes—avoids unsightly ringmarks and scratches—protect surfaces from dampness. Preserve the pottery—ventilated both top and bottom.
Exclusive Sunken Bottom construction collects water in center water well, delivers it to soil. Use MOIST-SHRUB PLANTRAY for beauty and economy.
No. 1—takes up to 5 in. pot, each.......... $0.50
No. 2—takes up to 8 in. pot, each......... $0.75
No. 3—takes up to 10 in. pot, each........ $1.10
No. 4—takes up to 12 in. pot, each........ $2.25
Florist Rubber Aprons........................ $2.00

HY-GRO

Analysis: 13-8-8. Soluble Plant food and starter solution. 2 lbs. $1.75; 5 lbs. $3.05, postpaid; not postpaid 10 lbs. $4.45.

PLANT FOUNTAIN SPRINKLER

Most practical for watering plants in the home. Correct amount of water where you want it. No spilling. Gardeners also say it’s ideal for watering seeds.

Each, postpaid $1.45.

“AIRWRAP” AIRLAYERING

Everything necessary for easy inexpensive airlayering plant propagation. Ideal for beginner, hobbyist and home gardener. Contains patented Airwrap coated plastic material, plant ties and genuine sphagnum moss as well as detailed illustrated instructions anyone can follow.
Price $1.95 each.

TRYSLAL “60” AUTOMATIC WATER TIMER

Automatically shuts off water. No watching or forgetting. Attaches to faucet and hose.
Price $5.35.

FOLIUM (Balanced Plant Food)

A concentrated water soluble plant food which can be applied with Monsanto’s Foliar, which is made of plastic, attaches between water faucet and garden hose.
1 lb. can with Foliar $2.10
5 lb. can with Foliar $5.40, postpaid
At store, 1 lb. can with Foliar $1.89
5 lb. can with Foliar $4.98

ORTHOcidE Garden Fungicide

Amazing versatile fungicide containing Captan. Controls BLACK SPOT on roses; 
POWDERY MILDEW on tuberous begonias; 
BROWN PATCH and other diseases on lawns.

SELLING POINTS:
1. Outstanding rose black spot control.
2. The most effective control for mildew on Tuberous Begonias.
3. One of the safest fungicides known.
4. Simplicity of application—as spray or dry seed treatment.
5. Compatible with most commonly used insecticides and fungicides.
6. Economical—1/2 lb. makes up to 25 gallons of diluted spray.
1/2 lb. canisters ................................ $1.50
21/2 lb. canisters ................................ $4.50

KRILium SOIL CONDITIONER

Conditions soil in the garden, for new lawns, for shrubs or planting boxes. 5 lbs. will treat about 100 sq. ft. 3 inches deep, or 600 ft. 1/2 inch deep.
1 lb. postpaid $1.55.
3 lbs. $4.35. postpaid $5.35.

TERSAN

Safe and effective non-muriatic for prevention or control of Brown Patch, Dollar Spot and Snow Mold on golf courses, lawns and other turf.
51/2 oz. $1.10; 3 lbs. $7.00, postpaid.
CUT YOUR LIVING COSTS

Plant Steckler's Prize Seeds and Trees
—Join Now in the National Health Program

Plant This Spring—Make your home yard an arsenal of health-giving fresh fruits and vegetables. Have plenty to eat and can or sell your surplus. The health of America's citizens is our nation's greatest asset. Eat more fresh vegetables and fruits right from your own yard.

MOTHERS—Make your children strong and healthy with husky bodies and sound souls.

WE PAY POSTAGE

We pay the postage on every order at the rate of $1.50, no matter how small the order or how many packets of seeds it may include. This applies to all orders, except those from students. This means that the home gardener requirements is delivered to his door free of charge.

QUICK SERVICE—Practically every order is shipped the same day it is received. You can depend upon prompt shipment.

ORDER EARLY—Look through this Garden Book and make your selections without delay so that you can get your order in early and be ready for the first planting days. Complete Index below.

THE PRICES QUOTED IN THIS CATALOG are net, and are subject to the right to advance prices without notice should current conditions require.

WE MAKE NO CHARGE FOR SHIPPING and CARTING of goods to any railroad station, steamship line or express office in New Orleans proper. Also we make no charge for packing, except special for foreign shipments, as tin-lined cases, double sacks, etc., then we charge cost.

SEEDS CAREFULLY TESTED—Every lot of seed in this catalog is carefully given a careful test to determine the purity and germination. This test is made in our own seed testing laboratory in the office of the實際. When the seed is shipped we attach to each bag a tag showing an analysis of the seed.

HOW TO SEND MONEY—Remittance should be made by Postoffice or Express Money Order or by Bank Draft. Personal checks accepted or U. S. Stamps in small amounts.

STECKLER SEED CO., Inc.

SATISFACTION GUARANTEED . . . or
Your Money Refunded

All seeds listed in this catalog are sold subject to meeting YOUR APPROVAL on arrival. You have the privilege of examining them and if you do not find them exactly as represented you are not obligated to keep them. You MUST be absolutely satisfied, or you may return them, and we will refund your money.

We cannot guarantee a crop. Success with the crop is contingent on numerous conditions over which we have no control. With respect to this point, all our seeds are sold according to the standard sea-warranty of the American Seed Trade, as follows: The Steckler Seed Co., Inc., warrants to the extent of the purchase price that seeds, bulbs or plants sold are as described in the container within recognized tolerances. Seller gives no other or further Warranty, expressed or implied.

DO YOU WANT THIS CATALOG?—Be sure to send us an order for seed if you want this catalog next year. If you do not send us an order your name is taken from our mailing list, believing that you have changed your address, or you may have come to the store where you such a catalog lost the counter. We prefer to have you on our list as an annual customer; then you will always get our catalog as soon as it is ready.

WHEN YOU CHANGE YOUR ADDRESS NOTIFY US IF YOU WANT THIS CATALOG.

STECKLER SEED COMPANY, Inc., NEW ORLEANS, LOUISIANA
Include Some of These Better Varieties In Your Garden

ARTICHOKEs

Culture—Planting time, Southern States: Sow seeds in seed bed from December to June; 1/2 inch deep in rows 15 to 20 feet of row 3 inches apart in the row and rows 1 foot apart (will produce 150 plants). Cover 1/2 inch with earth. Transplant in October to open ground 1/2 feet apart in rows and rows 3 feet apart.

LARGE GREEN GLOBE—French grown. Pkt. 20c.; oz. 85c., postpaid.

GROW THEM from STECKER’S High Quality Seeds

ASPARAGUS

Culture—Planting time, Southern States: Sow seed in seed bed from January to April in seed bed, 4 ounces of seed to 150 feet of row, 2 inches deep in rows 18 inches apart (will produce about 800 plants.) Transplant to specially prepared Asparagus beds in February and March. Select plants 24 inches deep, 24 inches apart in rows 4 feet apart. Send for booklet on Asparagus Culture, $1.50, postpaid.

MARY WASHINGTON—Result of development by U. S. Department of Agriculture to produce a rust-resistant vigorous strain of Giant Asparagus. Pkt. 10c.; oz. 35c.; lb. $2.25, postpaid.

MARY WASHINGTON ASPARAGUS ROOTS, 12 for 75c.; 25 for $1.10, postpaid. Not prepaid, 100 for $3.00.

GARDEN BEANS

Culture—Planting time, Southern States: Spring, January to May; Fall, August to November. Plant 1 pound to 180 feet of row 1/4 bushels to one acre; drop two beans every two or three inches in rows 1/2 feet apart, cover one inch with earth. Average production green beans about 100 bushels per acre.

TENDERGREEN

SNAP BEANS, DWARF OR BUSH—GREEN PODDED

Height of bush 15 to 25 inches. All varieties marketed as green beans except Red Kidney and White Navy or Boston which are left to mature.

AGSOW BLACK VALENTINE STRINGLESS—48 days. An improved selection of the old Black Valentine which is stringless and yet retains the valuable quality of the old type of being immune to damage by light frosts.

BLACK VALENTINE—49 days. Pods about five inches long averaging 6 to 7 beans to each pod; good for canning and shipping; very hardy and productive, one of the best sorts.

BOUNTIFUL—53 days. Pods longer than Black Valentine prolific to last harvest. Absolutely stringless at all stages, the very best for private and shipping purposes.

BURPEE’S STRINGLESS—50 days. Pods round, 6 inches long, tender and brittle. Absolutely stringless and largely grown for canning purposes, among the very best for shipping and private use.

GIANT STRINGLESS—54 days. An exceedingly productive sort, plants are large, vigorous and spreading. Pods large and nearly round of medium green color. Quality is very good for home use and one of the best for canning and shipping purposes.

STREAMLINER—55 days. One of the most productive of the bush green types. Long straight, semi-flat pods, 7 inches long and flabby. Quality excellent, stringless. Seed well kidney shaped, also excellent for drying.

LOGAN—52 days. Cross between the U. S. 5 Refugio and Stringless Black Valentine. It is resistant to powdery mildew and common bean mosaic. RED KIDNEY—Left to maturity. A red kidney-shaped bean used for baking and soup.

CONTENDER—54 days. A recent introduction, with resistance to common bean Mosaic and powdery mildew. Pods are stringless, round and seed buff lightly mottled. Ideal for home, marketing and shipping.

BUSH WAX BEANS

Height of Bush 15 to 25 inches

SURE CROP WAX—53 days. Vigorous and hardy, fluffy, stringless pods about six inches long, nearly round. A desirable variety for shipping as well as home use.

DAVIS STRINGLESS WHITE KIDNEY WAX—50 days. White kidney-shaped beans. Pods light yellow, long and straight, a heavy crop.

PENCIL POD WAX—52 days. Fairly hardy and productive, medium early, the very best for home use and near markets; pods are long, straight, round, flabby, tender, absolutely stringless.

IMPROVED GOLDEN WAX—48 days. Used largely by home gardeners; heavy bearing, vigorous grower. Pods large yellow, solid, brittle and waxy texture, and absolutely stringless. A good rust resisting variety.

BUSH LIMA BEANS

Height of Bush 15 to 25 Inches

NEW CALICO or JACKSON WONDER—55 days. Pods short, used also for shellin. Name “Calico” derived from appearance at maturity. An excellent Southern bean, both for family use and for shipping, cannot be too highly recommended.

FORDHOOK BUSH LIMA—77 days. An improved dwarf lima, sometimes called Potato Bush Lima. Plants are vigorous and erect, pods produced in large clusters, medium green, a popular variety for home and market purposes.

BURPEE’S BUSH LIMA—77 days. Plants are uniform dwarf, vigorous and productive, pods medium green, very large about five inches long. An extensively used bush lima.

FORDHOOK 242 BUSH LIMA—72 days. Strong, vigorous, bushy plants, literally loaded with medium pods containing 3 to 4 small flat plum beans. Beans until frost.

HENDERSON’S BUSH or BABY LIMA—68 days. Extremely early, hardy and productive, pods are medium dark green, short, flat of excellent quality either green-shelled or dry. Much used by canners.

CANGREEN—A new green seeded small bush lima of the Henderson type. Strong grower, more prolific and with slightly larger seeds.

STECKER SEED COMPANY, Inc., NEW ORLEANS, LOUISIANA
POLE LIMA BEANS

McCaslan Pole

SNAP BEANS—POLE or RUNNING GREEN POD
Use poles 5 to 8 feet long, set in rows 4 feet apart, plant 6 beans around pole. Half pound plants 150 hills; half bushel to one acre.

IDEAL MARKET—58 days. Thrifty and extremely prolific, yields better than other varieties of pole beans, thick, stringless pods, meaty, tender and excellent flavor, perfectly round. Excellent for shipping across country.

IMPROVED KENTUCKY WONDER or OLD HOMESTEAD—65 days. Early, very prolific sort of excellent quality. Vines are vigorous, very productive, comparatively straight. Best quality for home use and for shipping purposes.

McCASLAN POLE—65 days. Strong climber, hardy, prolific over long season. Pods dark green, thick, flat, meaty, almost stringless, tender and of a delicious flavor. Seeds ivory white.

STRIPED CREESEBACK—75 days. A very hardy and productive green podded bean. Pods are very cylindrical or completely "rod"ed, distinctly crease-backed, very fleshy and of excellent quality. Very good shipping quality.

CAN FREEZER—Pole Bean with a medium vine. Pods straight, stringless, dark green, excellent for freezing.

WHITE CREESEBACK—53 days. Green podded variety, valuable for its earliness, vigorous grower, pods are medium length, comparatively straight. They are of the best quality.

YARD-LONG—60 days. Pods average about 2 feet in length, very slender. Should be planted in every garden, due to its being prolific, tender and for its unusual flavor. A few beans make a family dish.

STRINGLESS KENTUCKY WONDER GREEN PODDED POLE BEANS—A new 65-day variety, unexcelled for flavor, texture and quality. Strictly stringless, vines are vigorous and uniform, very productive, bearing its pods in large clusters. Includes some of the fine new Stringless Kentucky Wonder in your garden.

POLE LIMA BEANS
CAROLINA or SEWEE—77 days. Very early and reliable pole lima especially adapted for planting in the South. Vigorous growing, and pods dark green, short, about three inches and curved. Highly recommended for home and shipping purposes.

SPOTTED or FLORIDA BUTTER—78 days. Larger pods than Carolina, very prolific, in great demand by Southern gardeners and for home consumption.

SOUTHERN WILLOW LEAF—92 days. Similar to the Sewee but a heavier yielder, earlier and prolific, leaves are willow leaf in shape and produces pods from the bottom to the very top of vine. Hardy and drought-resistant, thrives in sandy land, good shipper.

LARGE WHITE LIMA—88 days. Called King of the Garden. A true large lima pole bean, vigorous grower, extra large greenish white beans. Late variety and extensively planted.

POLE WAX BEANS
KENTUCKY WONDER POLE WAX—68 days. An early and attractive sort, one of the best of wax-podded snap pole beans. Pods are six to eight inches long, very good quality and highly recommended for shipping and home use.

WINDSOR BEANS
ITALIAN or ENGLISH—Long variety, 75 days. Plant about two beans every 6 inches and 21/2 feet between rows. Used same as Lima beans. It has gained fame and is being planted extensively by Italian gardeners for shipping and for home use.

BEETS

DETOUR
Culture—Planting time, Southern States: Spring, January to July; Fall, September to December. Edible condition about 62 days from time of planting seed. Plant 2 ounces to 150 feet of row, 12 pounds to one acre. Sow in thick rows 12 inches apart on heavy broadcast and thin to 10 inches apart.

CROSBY'S EARLY EGYPTIAN—Beets globe shaped, center of beet blood red, tender, excellent eating. Grown extensively by market gardeners in South for shipping and home use.

DETOUR DARK RED—Beets oval shaped, flesh of beet very dark red, an excellent variety for shipping and eating. A favorite of many large Southern market gardeners. Excellent for canning and shipping.

EARLY ECLIPSE—50 days. Extra early, uniform in size, deep red color, round, with small tap roots, flesh bright glossy red, crisp and tender.

WONDER BEET—One of the earliest of table beets for outside culture. One of the merriest red beet with distinct zones of lighter red. Of excellent quality, being sweet, tender and free from fibrous roots, good shipping and canning variety.

SUGAR and STOCK BEETS

Culture—Planting time, Southern States: Spring, January to July; Fall, September to December. Sow 5 pounds to one acre in rows 2 to 3 feet apart. When 4 or 5 inches high, thin to 12 to 15 inches apart in rows. Ready for harvest about 75 days after planting seed.

LONG RED MANGEL—Flesh white with redish tinge. Heavy yields, 18 to 24 inches long, about 8 inches in diameter. We recommend this as the best variety for stock feeding.

KLEIN WANDZELEN—75 days. Exceedingly valuable for stock feeding. Roots 12 to 15 inches; white with tinge of gray, very rich in sugar content, easily grown. Should be left in ground until frost to secure the largest crop.

BROCCOLI

BROCCOLI

Culture—Planting time, Southern States: Spring, January to June; Fall, September to December. Plant 1% ounces to 150 feet of row. Plant and cultivate same as Cauliflower.

GREEN CALABRESE—A distinct variety grown by Italian gardeners for Italian trade only. Forms large solid heads which remain green. After this is cut a number of sprouts develop from the leaf axis, each sprout terminating in a small head about one inch in diameter. Bunched and sold as second crop. Sow seed in frames early in spring and market in June and July. Also planted in September for Christmas marketing. Pkg. 10c; oz. 40c; 1/4 lb. $1.00; lb. $3.00; 5 lbs. $15.35, prepaid.

DE CICCO—An extremely early variety, producing large heads, light green in color and very productive. Pkg. 10c; oz. 40c; 1/4 lb. $1.15; lb. $4.00.

CARROTS

Culture—Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 1% ounces to 150 feet of row, 4 pounds to one acre. Sow fairly thick in rows 15 to 18 inches apart and thin to 3 or 4 inches apart in rows, when two inches high. Approximate number of days to edible condition is given below.

DANVERS HALF LONG—65 days. A half long orange carrot, grown extensively in all classes of soil, desirable for field culture. Mature roots are of medium length, six to eight inches long, tapering uniformly to a blunt point. Flesh is orange color, very tender and of excellent quality. Favorite for the South for shipping and home use.

EARLY HALF LONG CHANTENAY—65 days. An excellent medium early, half long variety. One of the best for marketing and home use, very productive and desirable. Roots are thick, 3/4 to 5 1/2 inches in length, uniformly half long or stump rooted but tapering slightly, smooth orange-red color. Flesh is very crisp and tender. Extensively used for bunching. IMPERATOR—77 days. Long, slightly tapering roots, few enough. Used extensively for stock feeding.

CHERVIL (Curled)

One of the finest and most delicate of endive or fines de printemps. Tops are used for seasoning salads, cream cheese, etc. Plant from December to April. Pkg. 15c.

CHIVES or SCHNITTLAUCH

One of the finest and most delicate of endive or fines de printemps. Tops are used for seasoning salads, cream cheese, etc. Plant from December to April. Pkg. 15c.

COLLARDS

Culture—Planting time, Southern States: Spring, June to September; Fall, October to December. Plant one-fourth ounce to 150 feet of row. Transplant 1/2 feet apart in rows 21/2 feet apart in open ground. Approximate number of days to edible condition is given for each variety. This varies with climatic and soil conditions.

EARLY ITALIAN GIANT—110 days. Large white compact heads, delicious flavor. A fine variety.

LARGE ALGERS—120 days. Large white heads, excellent quality, upright growth, leaves forming protection for heads against frost. The market gardener's favorite.

LATE ITALIAN GIANT—120 days. The largest of all Cauliflowers, very compact, grown very extensively and well liked.

STECKLER'S EARLY SNOWBALL—75 days. Large compact heads, a very desirable and dependable head-forming Cauliflower. The most popular variety among Southern gardeners. Favorite for shipping and home use.

SUPER SNOWBALL—15 days. Dwarf with short pale green leaves. Heads medium firm, compact, solid, pure white and of finest quality.

CAULIFLOWER

Culture—Planting time, Southern States: Spring, January to June; Fall, September to December. Plant half ounce of seed to 150 feet of row. Plant and cultivate as cabbage.

LONG ISLAND—Small cabbage-like heads of 1 1/4 inch diameter grow at each leaf joint on stalk about 20 inches tall. Heads mature successively. Pkg. 10c; oz. 50c; 1/4 lb. $1.25; lb. $4.00, prepaid.

BRUSSELS SPROUTS

Culture—Planting time, Southern States: Spring, January to June; Fall, September to December. Plant half ounce of seed to 150 feet of row. Plant and cultivate as cabbage.

**CABBAGE**

Culture—Planting time, Southern States: Spring, June to September; Fall, October to January. One ounce will produce about 3,000 plants, 5 ounces to the acre. Sow 5 or 6 seeds per inch in rows about 6 inches apart in well prepared beds. Cover very lightly with earth. Keep bed moist but not wet. Transplant to field when plants are 6 inches tall preferably on a cloudy day or in late afternoon. Frequent shallow cultivation for a short time is best. Distance between plants 12 to 15 inches; between rows, 24 inches. Approximate number of days to edible condition from time of planting seed is given after name of each variety. This varies with weather and soil conditions.

**COPENHAGEN**—75 days. Very vigorous, short stems, few outer leaves, producing a very hard round head, very uniform in size and of long keeping qualities. Very profitable, and gaining in popularity every day. Excellent for shipping and home consumption.

**DISEASE RESISTANT COPENHAGEN MAR**

**KETE**—75 days. A "yellow" resistant strain of Copenhagen. Not so early or as uniform, but a good round head and crisp.

**LARGE LATE FLAT DUTCH**—75 days. Large, solid heads, sometimes weighing 15 to 25 pounds. This is the most popular of the winter cabbage among Southern gardeners for home consumption and shipping.

**STEIN'S EARLY FLAT DUTC**

H—90 days. Heads flat, very large, compact, grows vigorously and has short stem. Many gardeners prefer this variety because of its excellent record of forming heads under unusual weather conditions. Good shipper.

**ALL HEAD EARLY**—90 days. Large, flat, compact and solid heads, few outside leaves, an excellent early cabbage. A dependable sort.

**CHINESE or PETSAIL**—75 days. Large, crumpled light green leaves resembling Paris Cos Lettuce. Leaves are eaten boiled or raw as a salad. Popular throughout the South. Has a distinct flavor, very mild and pleasant.

**DANISH BALL HEAD SHORT STEM**—100 days. Very hardy, sure heading, very solid, and of good quality. One of the very best keepers and desirable for distant markets. They are exceedingly hardy in resisting cold and stand dry weather well. Medium sized heads, round and solid, and stand shipment better than any other late sort.

**EARLY DRUMHEAD SAVOY**—85 days. Plants are vigorous, of medium size with rather short stem and very sure heading. Heads are large, nearly round, fairly solid, sweet and tender. Best for family use.

**JERSEY WAKEFIELD**

GLORY OF ENKHUIZEN—80 days. A sure header of matchless quality. Heads are nearly round, solid and of splendid size for an early variety. Leaves are broad and spreading and more or less curved. Has met with instant favor all over the South for marketing and home use.

**MAMMOTH RED ROCK**—75 days. Largest and surest heading red cabbage. Plants large and vigorous with medium length stem and spreading outer leaves which are dark green with red veining. Heads are late maturing, large, round, very solid and of very attractive deep red color. Much used for cole slaw and pickling.

**EARLY JERSEY WAKEFIELD**—68 days. A most excellent variety, is the earliest and surest heading of first early cabbage for the market and home garden. Most gardeners depend on it for their extra early crop. Plants hardy, resistant to cold and unfavorable conditions. Compact and erect or very slightly spreading. Stem short, heads medium, very solid, uniformly pointed and of excellent quality.

**CHARLESTON WAKEFIELD**—88 days. Very solid head, but less pointed and considerably larger than the Early Jersey Wakefield. Its exceeding hardiness, earliness and size of head have made it a popular sort with market gardeners and shippers. Plants are medium sized, very vigorous and slightly spreading. Heads are moderately large and solid, weighing up to 10 pounds.

**GOLDEN ACRE**—65 days. Very compact medium sized heads, uniform in size and in maturing. Very popular for shipping and home use.

**WISCONSIN ALL-SEASON**—90 days. Valuable in territories infested with the destructive disease known as "yellows." Heads are large and solid, weighing up to 10 pounds.

**WISCONSIN HOLLANDER No. 9—100 days.** Heads round, heading slightly flattened across the top; color blue green. Heavy yielder, an ideal cabbage for storage and shipping. Highly resistant to the "yellows."

**CARDOON**

Culture—Planting time, Southern States: Spring, January to April, Fall, September to December. Broad leaf, plant 3 ounces to 150 feet of row. Water Cress—2 ounces will plant space about 9 x 9 feet in water.

**BROAD LEAVED or UPLAND CRESS**—This variety is extensively cultivated for market. It is sown from early Fall to late Spring. The leaves resemble Water Cress. It is a wholesome dish as a salad alone or in combination with other vegetables.

**WATER CRESS**—Used extensively for salad making. About 75 days to edible or marketable condition.

**CORN SALAD**

Culture—Planting time, Southern States: Spring, June to September. Plant 2 ounces to 150 feet of row. Sow thinly in drills. Leaves are used same manner as lettuce and cress.

GARDEN CORN

GOLDEN CROSS BANTAM

ARISTOGOLD BANTAM—83 days. A true aristocrat of the sweet corn hybrids. Fast growing, makes exceptional yields even in hot, drizzly seasons, because it stands early planting in cold wet soil. Has great resistance to ear worm and small damage. Stalks 9 to 9 ft. tall and ears extra long with 12 to 14 rows. Sweet, tender and delicious.

GOLDEN BANTAM—88 days. Most widely known early variety, grown in every section, stalks five feet in height, heavy foliage, ears 6 to 7 inches long, eight rowed, with broad kernels of a golden yellow color. Flavor distinctly different. Stooks very rapidly and should be allowed to remain as the sweet corn are productive of an ear.

COUNTRY GENTLEMAN—90 days. Stalk 6 V2 to 7 feet. Ears slim, about 8 inches long. Grains are large, irregular, very narrow. Considered by many one of the best corns for family garden. The silk on Country Gentleman ears is always very red and it can be easily distinguished by this feature.

STOWELL’S EVERGREEN—86 days. Height of stalk about 71/2 feet. Ears about 8 inches long, very white, excellent roasting ear variety. Market gardeners grow this variety more than any other.

GOLDEN CROSS BANTAM—An outstanding hybrid bred for yield and quality. Larger well filled and uniform ears.

HYBRIDS

LOUISIANA HYBRID $21—Proven to be one of the best. It is adapted to Central and Southern Louisiana soils and weather. It is white, prolific and a dent type. As it has good shock resistance it is more weevil resistant. Lb. 50c: 2 lbs. 75c: 5 lbs. $1.60. Not prepaid; Peck $3.55; 1 bu. $6.80; bu. $11.00.

DIXIE 18 YELLOW HYBRID—This hybrid is an exceptional high yielding corn for this area. It has excellent root strength to resist drought and is of superior standing ability. It is two eared of good size, and has a tight stalk which affords insect protection. The kernel is medium hard. Lb. 50c: 2 lbs. 75c: 5 lbs. $1.60. Not prepaid; Peck $3.55; 1 bu. $6.80; bu. $11.00.

FUNK’S G-737 YELLOW HYBRID—A new yellow hybrid with a heavy shock covering and large ear. Especially adapted to Louisiana conditions. Hires yielder, for early planting. Lb. 50c: 2 lbs. 75c: 5 lbs. $1.75. Postpaid. Not prepaid; Peck $3.60; 1/2 bu. $6.45; bu. $11.00.

SWEET CORN

IMPROVED ADAMS EARLY—Large, 88 days. Similar in type to the Adams Extra Early but somewhat later although still a very early sort. Used as a table corn throughout the South for both home use and shipping; average height of stalk 4% feet.

SILVERINE—95 days. Large white corn, ears 9% to 10 inches with 16 to 20 rows of large deep kernels. Rough dent, tall, handsome stalk. White cob. One of the best roasting ears and shipping varieties yet introduced.

EXTRA EARLY ADAMS—83 days. Stalks about 3% feet tall, ears about 51/4 inches long. One of the best for early ears and is the first that can be planted. Usually 12 rowed, white kernels and white cob.

TRUCKER’S FAVORITE—90 days. Large, late corn used for roasting. Ears around 11 inches long with 12 to 14 rows of broad white kernels. Stalk tall and matured. One of the leaders for shipping.

FIELD CORN

JARVIS GOLDEN PROLIFIC—Matures dry corn in 115 days or less, one of the finest early yellow corns, 14 to 18 rows to the ear, heavy yielder and prolific.

IMPROVED YELLOW LEANING—110 days. Long yellow ears. Tall stalks producing two good ears, very productive, an excellent variety for the South. A splendid feeding variety, one of the best.

HILL’S CROOLE YELLOW DENT—110 days. Deep yellow grains, closely packed, butts and tips covered, used very extensively for ensilage. The favorite in this section, an excellent variety for feeding and for making grits.

SURECROPPER CORN—Ears not quite as large as other varieties, makes roasting ears in about 60 days and matures in about 110 days. Has drought resisting qualities thoroughly adapted to the South.

CALHOUN RED COB—Cob deep red in color, kernels white and yellow. Matures in 130 to 150 days from planting. One of our leading Southern varieties.

WHITE TUPAN—Matures in 140 days. Late, tall growing variety. Its long, tight shucks make it resistant to damage by corn ear worms and weevils. Ears large, heavy and well filled. Grain white and hard.

IMPERIAL WHITE DENT—125 days. Large ear, stands well weather and drought better than other varieties. Good roasting ears, and make good table and shipping, good for feed and for use.

HASTING’S PROLIFIC WHITE—100 days. Requires a fairly long season to develop, hard corn. Stalk is large, 8 to 12 feet tall, according to soil and season. Ears of medium size, two or more to the stalk, depending on the distance given and the growth corn. Cob filled out. Best corn for grain production, for roasting ears, for making meal and for stock feeding.

SHOE PEG WHITE—100 days. Ear is medium size and length, and has a very small rich red cob. Grains large and pointed, 18 to 20 rows to ear, well filled to the ends. Easy to shell and feeding value for stock is unsurpassed.

SHOE PEG YELLO—100 days. Similar to above but a golden yellow grain.

IMPROVED GOLDEN DENT—High yielding, yellow corn for the South. Medium early variety maturing in 110 to 115 days. Makes one to two ears, well filled out on both ends.

IMPROVED MEXICAN JUICE—125 days. A very dependable variety for feeding. From the Spring throughout the Cotton Belt. Stalks are usually short, ears 8 to 9 inches long, grains short to medium size, cob medium in size, white with a few blue grains. The best late corn for the South.

POP CORN

SOUTH AMERICAN or DYNAMITE—Vigorous grower, deep orange kernels, smooth and round, which pop double the size of others. Yellow, crisp and tender no hard centers.

STECKER SEED COMPANY, Inc., NEW ORLEANS, LOUISIANA
**CELEY**

Culture — Planting time, Southern States: For bleaching celery, June to August; for seasoning purposes, any month. Plant 1½ ounces to 150 feet of row. Sow seed in a bed, cover with canvas to protect from heat. Transplant to large bed when about 3 inches high to rows 3 feet apart, plant 8 inches apart. When about matured earth is brought up around the plants or boards are placed on both side of rows for proper bleaching. Approximate time of maturity is given after each variety. This varies with climatic conditions and soil.

**GOLDEN SELF-BLANCING**

**GOLDEN PLUME CELERY**—Early, delicious and self-blanching. Early maturing, large and vigorous grower, easy to cultivate, very attractive and when matured is most inviting. Foliage creamy yellow and stalks creamy white, brittle, tender and well flavored, profitable for market and home use. Extra fine strain.

**GOLDEN SELF-BLANCING — 118 days**

**GIANT PASCAL**—135 days. Grows about 2 feet high, forms broad, thick, crisp stalks, entirely stringless. Very desirable and planted extensively throughout the South.

**WHITE PLUME CELERY**—112 days. Early variety, leaves bright green, tinged white, easily blanched, solid, crisp, fine quality.

**CELERIAC TURNIP ROOTED**—135 days. Forms a turnip-shaped root which is used extensively for soup, sliced and cooked, or salad.

**CUCUMBERS**

Culture — Planting time, Southern States, Spring, February to July; Fall, August to September. Plant five ounces to 150 feet of row, 4 pounds to acre. Sow in hills 2 to 4 feet apart. Each hill should be fertilized heavily with rich decomposed manure or other suitable fertilizer. Plant about 8 to 10 seeds to each hill. Approximate number of days to edible condition given after each variety.

A & C — 60 days. Fine dark green variety. Disease resistant vines which produce an abundant crop of uniform cucumbers, fully 10 inches long and straight.

CLARK’S SPECIAL — 60 days. An outstanding variety, deep green in color, symmetrical fruits about 9 to 10 inches long. Very firm and considered one of the best for shipping. Bears abundantly from early to late in the season. Truly a very fine variety.

CUBIT — A dark green, white spine, averaging 9 inches in length. Ideal for slicing and shipping with firm white flesh.

DAVIS PERFECT — 65 days. Dark glossy green color, average length 10 to 12 inches. Seeds soft, cucumber tender and brittle.

EARLY FORTUNE — 70 days. An excellent shipping variety, producing very attractive white spined fruits of rich dark green color. The fruits average uniformly about nine inches long.

MARKETER — 70 days. Noted for uniformity, deep green in color, has become the leading early shipper. Fruits medium dark green, slightly tapered to both ends.

IMPROVED LONG GREEN — 70 days. Very dark green, length about 12 inches, one of the best and largest cucumbers on the market, none better. Excellent for table and shipping.

STRAIGHT EIGHT — 65 days. Almost cylindrical fruits; well rounded on ends, straight and eight inches in length. Deep green, very productive and vigorous growing, ideal for slicing.

JAPANESE CLIMBING — 60 days. Strong, vigorous vines can be grown on trellis. Cucumbers round, about 10 inches long, thick. Grown extensively for shipping and table.

WEST INDIA GHERRIN (For Pickles) — 60 days. Very small, oval fruits, prickly sort, very distinct from all others and grown exclusively for pickles. Fruits should be picked when young and tender. Seed is distinctly smaller than that of other cucumbers and requires from two to three weeks to germinate.

STAYSGREEN — 60 days. The greenest of the Long White Spine varieties. Hardy, large fruited, of excellent shape and uniform. A favorite among market gardeners. Used extensively for shipping.

PALOMAR — 64 days. Early and very productive. Fruit is even deep green about 8 inches long, does extremely well in the South. A new outstanding Downy Mildew Resistant Cucumber.

IMPROVED WHITE SPINE — 60 days. Prolific, continues producer of uniform, large and cylindrical cucumbers. Excellent for slicing. A favorite wherever grown.

PALMETTO — 67 days. Resistant to downy mildew; fruits are very dark green in color and taper slightly at both ends; white spines, an important variety for fall planting in the South.

SNOW’S or HEINZ PICKLING — 52 days. An early maturing, small dark green cucumber, round square ended, grown largely for pickling. A very fine variety.

EGG PLANT

Culture — Planting time, Southern States: Spring, January to March; in hotbeds, in open ground, April to June; Fall, September to October. Plant one ounce of seed to 150 feet of row. Approximate time to edible condition is given after name of each variety; this varies, due to climatic and soil conditions. Half pound of seed will furnish plants for one acre.

NEW ORLEANS MARKET or LARGE PURPLE—90 days. This is the variety mainly grown here, oval in shape and of a dark purple color and very productive. Southern grown seed of this, as of a good many tropical or sub-tropical vegetables, is preferable to Northern seed, as it will germinate more readily and the plant will last longer during the hot season. Best variety for shipping and home use.

FORT MYERS MARKET—85 days. Vigorous and productive bush, nearly egg shaped, ideal size for shipping. Deep purplish black color.

BLACK BEAUTY—85 days. Rich, shiny purplish black color, heavy producing plants hardy, grown very extensively by small and large gardeners.

FLORIDA HIGH BUSH—60 days. Very large, dark rich purple fruits of excellent quality. Produces 6 to 8 fruits. Growing in popularity every year.

IMPROVED NEW YORK SPINELESS—83 days. Large sized very dark purple fruits. Plants produce about 8 to 10 egg plants, a very popular variety.

FENNEL

(Italian or Florence, Imported)

Culture—Planting time, Southern States: Spring, March to June; Fall, August to November. Plant 1/4 ounces to 150 feet of row. Sow in rich well prepared soil in drills 2 feet apart and cover 1/4 to 1/2 inch with earth. When plants are 2 inches high, thin to 10 inches apart in row. Blanche the stems. Used extensively by Italians of New Orleans and vicinity and for shipping to Eastern markets. Used very much the same as celery.

GARLIC (Sets)

Culture—Planting time, Southern States: Spring, January to June; Fall, September to November. Plant one ounce to 150 feet of row, 300 pounds per acre. Plant 6 inches apart and about one inch deep in row 2 to 3 feet apart. Used very extensively throughout the South for flavoring stews, roasts and various other dishes. About 90 days to edible condition.

EGG PLANT

ENDIVE

Culture — Planting time, Southern States: Spring, February to June; Fall, September to November. Plant one ounce to 150 feet of row, 3 pounds to the acre. Sow either broadcast and transplant like lettuce or in rows one foot apart and thinned to 8 inches apart. Used for salads. Approximate time to edible condition is three to four weeks. Bleached by tying up leaves or covering bleached.

FULL HEART BATAVIAN—90 days. An improved variety with large leaves, broader and thicker and earlier in maturity than any other variety. Plants are upright growing, compact heart that blanches easily.

ITALIAN RED RIBBED (Pomacolle)—Hardy, vigorous growing endive with bright, deep green leaves, the mid-ribs of the outer leaves are usually tinged with rose. The dense mass of deeply divided leaves forms in the center blanches readily to rich cream color.

HERBS

Aromatic, Medicinal and Pot. Planted in Early Spring.

ANISE—An annual, cultivated for its seeds and its leaves which have a transparent agreeable scent and a pleasant taste. Pkt. 15c.

BORAGE—Splendid leaves for flavoring. Pkt. 15c.

CARAWAY (Kuempel)—The seeds are useful for flavoring. Pkt. 15c.

CORIANDER—Annual as tender leaves are usually used for soups and salads. Pkt. 15c.

DILL—Annual, it is cultivated for its seeds, which are used for medicinal purposes and for flavoring pickles. Pkt. 15c.

FENNEL—Perennial, leg is made from the seed and is an excellent remedy for colic and stomach complaints. Pkt. 15c.

MARRIQUAM—Biennial, the leaves are used in soups, the seeds in the manufacture of sausage, an aromatic of sweet flavor. Pkt. 15c.

ROSEMARY—Seasoning (aromatic leaves). Pkt. 15c.

RUE—For medicinal purposes: good for all tooth aches. Pkt. 15c.

SUMMER SAVORY—Flavorn. Pkt. 15c.

SAGE—Perennial, tea made from these leaves is an excellent means of producing perspiration. Pkt. 15c.

SWEET BASIL—Annual, the leaves are used for highly seasoned dishes as well as in soups, stews and sauces. Pkt. 20c.

THYME—Perennial. Thyme tea is an excellent remedy for nervous headaches. Pkt. 20c.

HORSERADISH (Roots)

Culture — Planting time, Southern States: Spring, January to April. Set out roots in rich, moist, well prepared ground in rows 2 1/2 feet apart, set roots vertical, small end down, top of root 1 to 2 inches below surface. Cultivate through the season until tops cover ground.

Dozen 45c: 100 $2.25. Postpaid. Not pre-paid, $18.00 per 1000.

STECKLER SEED COMPANY, Inc., NEW ORLEANS, LOUISIANA

9
LETUCE

Culture—Planting time, Southern States: Spring, January to June; Fall, September to November. Plant one to 150 feet of row, 3 pounds to one acre. If planted during hot weather, soak seeds for 2 hours in water, preferably on ice if convenient, and wrap in damp cloth. Keep for six days in damp cloth until sprouted, then plant. Ants very often carry away the seed before sprouting but this treatment stops it. Approximate time to maturity is given after each variety. This varies with soil and climatic conditions.

FLORIDA ICEBERG—83 days. Very popular variety. Crisp heading plants of medium size; leaves smooth, thick, medium light green. Heads round and well folded.

GREAT LAKES—An outstanding new Lettuce of iceberg type. Stands the heat and sun and is unusually slow to go to seed. One of the best.

BIG BOSTON—75 days. Extra large, round, very firm, light green heads. Majority of market gardeners in South are growing this variety for shipment and table use.

NEW YORK WONDERFUL—90 days. Crisp, large heads, dark green colored leaves. Produces most compact heads. Excellent for shipping.

GRAND RAPIDS—65 days. Non-heading, leaves crisp, light green, curled, fringed. Delightful flavor.

HUBBARD’S MARKET—60 days. Forms large, crisp, solid heads. Stands heat well. Only variety planted in summer.

ICEBERG—94 days. Heading, curled, medium size, crisp, green, fringed leaves enclosing crisp white interior. A very popular variety.

BIBB—57 days. Distinct butter head type, dark green variety, forming a rather loosely folded head of small size.

ROMAINE or PARIS WHITE COS—70 days. Loose leaf lettuce with the leaves frilled, green and free from the brown tint; heart buttery yellow.

CHICKEN LETTUCE—For chickens or rabbit feeding, very productive, when cut, starts right in to grow again. This variety of lettuce does not head but sends up stalks 3 to 4 feet high. Heavily leaved which can be pulled off like kale.

KOHL-RABI

Culture—Planting time, Spring, January to April; Fall, September to December. One ounce will produce about 3000 plants. Sow in light, rich soil in rows 1 1/2 feet apart, then thin to about 5 inches apart in rows. 1/4 pound to the acre.

LARGE LONDON FLAG—90 days. Well known broad leaved lettuce; is hardy, productive of good quality and extensively cultivated in this country.

GIANT MUSSELBURGH—125 days. Largest variety in cultivation, large thick, sweet stems, unusually tender and keeps its whiteness.

LEEK

Culture—Planting time, Spring, January to June; Fall, September to November. Plant 4 ounces to 150 feet of row. Also sow broadcast and then transplant 1 inches apart in rows about 12 inches apart, 4 lbs. to the acre. Belongs to the onion family and is used for flavoring stews and soups.

CHINESE BROAD LEAF

CHINESE BROAD LEAVED—Large, dark green, smooth leaves sometimes 2 to 3 feet high and one foot wide; excellent variety.

SOUTHERN CURLLED—Pale green, large curled leaves, scalloped edges, the most extensively grown variety. Highly recommended for shipping.

TENDERGREEN—Can be sown nearly every month in the year in the South. Easy to grow and ready for market in 23 to 30 days. Requires 3 to 5 pounds to the acre and planted in rows 2 to 3 feet apart. Withstands the extreme summer heat and is resistant to cold weather. Leaves are large, oblong and dark green in color with small center rib. Cooks same as Spinach, Turnip or Mustard Greens.

MUSTARD

Culture—Planting time, Southern States: Fall, September to December; Spring, January to June. Plant 2 ounces of seed to 150 feet of row, 2 pounds to one acre. Sow either broadcast or in rows about 1 foot apart. Approximate time to edible condition of all varieties, 50 days.

CHINESE BROAD LEAF

CULTIVATION—Planted for market, or sown in rows 1 1/2 feet apart.

NORTH CAROLINA CURLLED—Known as white curled. Damp soil makes this variety curl.

WONDERFUL—Large, crisp, tender leaved, excellent keeps.

BROAD LEAF—Large, crisp, tender leaved, excellent keeps.

LEAF—Large, crisp tender, keeps well.

KALE=

SOUTHERN—Large, crisp, tender, keeps well.

AMERICAN—Large, crisp, tender, keeps well.

LEAF—Large, crisp tender, keeps well.

KALE—Large, crisp, tender, keeps well.

WONDERFUL—Large, crisp, tender, keeps well.

LEAF—Large, crisp tender, keeps well.

KALE—Large, crisp, tender, keeps well.
MUSKMELON
or CANTALOUPES

Culture—Planting time, Southern States: Spring, February to June. Plant in rich, sandy loam soil. Mix well rotted manure or any good fertilizer in each hill before planting. Plant 8 to 12 seeds in each hill about 1 inch deep, and thin to 1 plant per hill when 3 or 4 inches high. When plants are 3 inches high, thin to 3 to 4 plants per hill. Approximate time to maturity given after each variety. This varies with climatic and soil conditions.

HALE'S BEST—A new variety, very early and recommended highly for long distance shipping. Salmon flesh of exceptional thickness, shape is oval, very heavy netting and prominent ribs.

HONEY ROCK—90 days. Very prolific, heavier, coarser netting than Honey Ball. Almost round, medium size, rich salmon flesh of fine quality. Outstanding for home use and earliness and a good market variety.

NEW ORLEANS MARKET—80 days. Greenish yellow flesh, long slightly ribbed, grows demand wherever grown, very popular.

BANANA—78 days. Yellow flesh, about 18 inches long, 3 to 4 inches in diameter, curved end, ribbed, a popular variety.

EARLY HACKENSACK—70 days. Flesh and skin greenish brown, large size, ribbed, excellent tasting. Popular throughout the South.

GOLDEN BEAUTY CASABA—110 days. Very large, golden yellow flesh, ribbed, one of the best on the market. We recommend this variety very highly.

MILWAUKEE MARKET (orange flesh)—94 days. A splendid size, sometimes averaging 20 to 25 pounds, and possesses a very delicious flavor. A very prolific variety and splendid for shipping.

TEXAS RESISTANT NO. 1—80 days. Resistant to downy mildew and aphids. Fruits fairly uniform, about 8 inches long, Rind firm and fine textured, flesh sweet and spicy.

POLLOCK'S 10-25—This excellent main crop melon of the Rocky Ford type is one of the most popular of shipping varieties. Fruits nearly round or slightly oval, show no ribbing and are densely netted over the entire surface. Flesh is rich salmon at center, shading to light green at rind. Seed cavity is very small.

ROCKY FORD or HART'S VICTOR—74 days. Small size, prolific producer; green flesh, a favorite in the South. Good shipper.

WATERMELON

Culture—Planting time, Southern States: Spring, February to June. Plant in light sandy soil, mix well rotted manure or any good fertilizer in each hill before planting. Plant 8 to 12 seeds in each hill about 1 inch deep, and thin to 1 plant per hill when 3 or 4 inches high. When plants are 3 inches high, thin to 3 to 4 plants per hill. Approximate time to maturity given after each variety. This varies with climatic and soil conditions.

DIXIE QUEEN—90 days. A white seeded variety, round and finely flavored, sweet and juicy, firm flesh which seems to be all heart because of the very small seeds. A good shipper due to a tough rind.

FLORIDA GIANT—95 days. Vigorous growing and heavy producers. Melons are nearly round in form, skin solid dark green, flesh red and firm. A good shipper. Grows larger than any other variety, not unusual for specimens to weigh 100 pounds.

SELECTED TOM WATSON—85 days. 18 to 24 inches long, compact, deep red flesh, free from core, special selected seed of the Tom Watson variety.

CONGO

EDEN GEM—70 days. Salmon color flesh, large, practically no ribs, almost round. We recommend this variety very highly.

PINK FLESH ROCKY FORD—78 days. Oval shape, about 5 inches in diameter, small seed cavity, deep pink flesh, wonderful tasting. Grown extensively.

HONEY DEW—45 days. Known as the Golden Honey Dew except it has emerald green flesh. Has honey-like flavor, in great demand wherever grown.

RATTLENAKE (Georgia)—85 days. Light green color, lightly mottled and stripped, flesh scarlet, thin rind, excellent shipper, very popular.

</table>

NEW HAMPSHIRE MIDGET—The watermelon you can eat like cantaloupe. Very small oval shaped, early maturing "ice box" melon. Light grey-green with dark stripes, flesh bright red with black netting.

STONE MOUNTAIN—90 days. Almost round, rich dark green. Flesh is rich scarlet, fine grained and especially sweet. Seeds white. Under favorable conditions weigh 50 to 65 pounds.

WONDER—75 days. Larger and heavier than Tom Watson, very prolific, excellent flavor, one of our best varieties.

CONGO—90 days. Bred for resistance to anthracnose, but not immune. Tough rind and firm, fine grained flesh, especially adapted to Southern shipping. Fruits are oblong, blocky, dark green faintly striped with a lighter green.

FLORIDA FAVORITE—80 days. Long, dark green with light, thin, red flesh to the rind. Excellent tasting.

HABBERT's HONEY—80 days. Oblong, dark green with irregular mottled striping, one of the best tasting melons on market, a favorite.

KLECKLEY'S SWEET—80 days. Rind very dark green and thin, flesh deep scarlet, one of the best.

CANNON BALL—90 days. Large, dark glossy green, thick rind, flesh dark red and sweet; an exceptionally popular variety.

PRESERVING CITRON—90 days. Small round, light and dark green striped. Used only for sweet pickling and preserving, grown extensively.
OKRA

Culture—Planting time, Southern States, Spring, January to April; Fall, September to November. Two ounces will plant 150 feet of row, 8 pounds to the acre. Sow in deep, mellow soil in rows 12 to 18 inches apart. When plants are 3 inches high, thin to 3 inches apart in the row.

Red Wethersfield—120 days. Large, broad, flat, reddish colored bulbs, excellent, good producer, well liked.

Riverside Sweet Spanish (Yellow)—Large yellow variety of Spanish origin, similar to Prizetaker, but larger. Globular, with golden yellow skin, flesh white, very mild and of pleasing flavor. Prolific and desirable for shipping and storage.

Silverskin (White)—A most widely used white onion, excellent for sets, as a pickler, for green bunching and storage. Medium sized, thick, flat, clear white, hard and firm, excellent for flavor.

PARSNIPS

Culture—Planting time, Southern States. Spring, January to April; Fall, September to November. Plant 150 feet of row, 8 pounds to the acre. Plant for 10 or more inches apart. Plant in rich, mellow soil. Parsley seed starts growth slowly, we suggest soaking seed in water for 10 to 12 hours before planting. Saw thickly in rows 1 foot apart; when about 3 or 4 inches high, thin to 8 or 6 inches apart. Number of days to edible condition given after variety.

Plain Leaved—75 days. Dark green foliage, very hardy, strong flavor. A favorite for Southern tables.

Double Curled—90 days. Leaves curled and crimped, grown very extensively for market.

Hambug or Rooted—Forms thick, fleshy edible roots that are used for flavoring.

ONIONS

Onion sets are large for planting home gardens for early greens and also for market. Plant in rich, well cultivated ground in rows 10 to 12 inches apart, and 2 inches apart in the row. 6 bushels to the acre. Plant for Spring from March 1 to April. Fall, September to November.

Red Wethersfield—Very hardy, good keepers, one of the best all purpose red onions.

Yellow Danters—Make medium sized, globe-shaped, yellow onions, very fine.

White Silverskin—Very attractive onion, makes large silvery onions.

PARSLEY

Cultivation—Planting time, Southern States. Spring, January to April; Fall, September to November. Plant in rich, mellow soil. Parsley seed starts growth slowly. We suggest soaking seed in water for 10 to 12 hours before planting. Saw thickly in rows 1 foot apart; when about 3 or 4 inches high, thin to 8 or 6 inches apart. Number of days to edible condition given after variety.

PLAIN LEAVED—75 days. Dark green foliage, very hardy, strong flavor. A favorite for Southern tables.

DOUBLE CURLED—90 days. Leaves curled and crimped, grown very extensively for market.

HAMBURG OR ROOTED—Forms thick, fleshy edible roots that are used for flavoring.

POTATOES

First and Best

Distance in rows and between rows is governed by the height of the different varieties. Approximate number of days to edible condition is given after each variety; this varies with climate and soil conditions.

WRINKLED VARIETIES

LAXTON’S PROGRESS—60 days. The earliest of all large podded dwarf sorts. Dark green pods about 4 inches long. Vines 18 to 24 inches high, very productive. Splendid for home consumption and for shipping purposes.

LAXTONIAN—62 days. A very choice variety, and very prolific. Vines grow 15 to 18 inches tall. Produce straight, pointed deep green pods. Each pod contains 6 to 8 large, sweet, deep green peas.

LITTLE MARVEL—62 days. Dwarf variety, about 18 inches high. Valuable for home and early shipping. Vines dark green, medium stocky. Pods single and double, dark green, blunt, plump, well filled with 7 or 8 tender peas. Seeds medium size, light green, squarish, wrinkled.

AMERICAN WONDER—60 days. Height of vine, 1/2 feet; pods full and 3 1/2 inches long. A prolific producer, an excellent variety.

CARTER’S IMPROVED TELEPHONE—70 days. Pods 4 1/2 inches long; height of vine 4 feet, an excellent producer.

GRADUS or PROSPERITY—65 days. Pods 4 1/2 inches long and vine 3 feet in height, grown extensively.

THOS. LAXTON—54 days. Height of vine 3 feet, pods 4 inches long. Market gardeners are growing this variety very extensively.

CREOLE EXTRAS—60 days. Height of vine 1 1/2 feet, pods 3 inches, a prolific producer. One of our best and most popular varieties. Seed small, smooth, yellowish white. Stock offered is much superior to most of the market and recommended highly.

MAMMOTH POCKETED EXTRAS—55 days. Vigorous growing vines, medium height and about 25 to 30 inches high. Pods are light green, and 3 1/4 to 3 3/4 inches long, round, heavy and plump pods, containing about 7 to 8 peas to the pod. A very productive variety for anyone wanting a large podded sort.

DWARF GRAY SUGAR (Will Resistant)—70 days. Vines 12 to 15 in. tall, abundant bearer, pods 2 1/4 to 3 1/4 in. long. Color pale green, quality excellent.

EARLY ALASKA—60 days. Vines 2 1/2 feet tall; pods 3 inches, prolific producer, an extra fine variety.

EARLY WASHINGTON—50 days. Pods 3 in. long, vines 2 1/2 feet high. A wonderful producer.

LARGE WHITE MARROWFAT—85 days. Pods 3 inches long, vines 5 feet tall, grown extensively.

MELTING SUGAR—78 days. Very large pods, 4 to 5 inches long. Height of vine 5 feet; eaten both shelled and in pod.

SWEET POTATOES

PORTO RICAN YAMS only, best variety and good keeper. Can ship into Louisiana only, and to other states on special permits.

STECKLER SEED COMPANY, Inc., NEW ORLEANS, LOUISIANA
PEPPERS

California Wonder—75 days. Large bright red glossy type, similar in shape to Crimson Giant but far superior, of mild delicate sweet flavor, early and unsurpassed for shipping, a heavy yielder.

Chinese Giant—80 days. Very large scarlet red peppers, mild and thick seeded, 4 inches in diameter, plants 2 feet high. One of our best and most popular varieties for market and home gardens.

Florida Giant—75 days. Fast becoming a favorite of Louisiana truckers. Prolific bearer, large, dark green color and smooth.

World Beater—75 days. A large red pepper, thick meated, mild tasting, used extensively and well liked.

Perfection or Pimiento—Thick fleshed, mild and sweet, smooth glossy green turning bright red.

Ruby Giant—75 days. Bright scarlet color when ripe, very large and mild tasting, bush 2 1/2 feet high. Many gardeners will plant no other.

Ruby King—75 days. A vigorous and productive plant 2 1/2 feet tall. Peppers bright scarlet color when ripe, a very large and excellent variety.

Oakview Wonder—83 days. Fruits blocky, smooth, thick, mild sweet flesh. Plants stockier than California Wonder but fruits are set earlier and more abundant.

HOT PEPPERS

Long Red Cayenne—110 days. Pods 4 inches long, twisted and pointed. Very pungent, bush about 5 feet tall, a favorite with many Southern gardeners.

Tabasco—75 days. Small pointed red peppers bush 3 feet high. Prolific producer, very hot, the nationally known Tabasco Sauce is made from this excellent variety.

Radicshes

Culture—Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 3 ounces to 150 feet of row, 8 pounds to the acre, about 10 inches apart and cover lightly. If too thick radishes do not form properly and crowd each other. Plants should be about 2 1/2 inches apart, allowing proper space for development of Radishes. Radishes constitute a very large crop for Northern markets. Approximate time to edible condition is given after each variety. This varies due to climatic and soil conditions.

Cincinnati Market—28 days. Popular for home and market use. Tops short and small, roots are 6 to 7 inches long, cylindrical and tapered near tip, deep red with purplish tinge. Flesh white and crisp.

Sparkler Turnip White Tip—20 days. One of the best early Radishes for the home garden and a favorite in large markets for early planting outdoors. Roots are nearly round, slightly flattened on the underside. Color is very bright, deep rose scarlet with a distant white tip. Flesh is white and of the best quality.

Crimson Giant Turnip Radish—25 days. Very large, round, scarlet color, good shipper, grown very extensively and very popular.

French Breakfast—22 days. About 1 1/4 inches long and about 1/4 inch in diameter, deep scarlet color, except a little white around root. We recommend this variety very highly.

Brightest Scarlet or Three-Quart Long—25 days. Bright scarlet color, averages 6 inches long, a favorite.

Early Deep Scarlet Turnip—22 days. Small, round, deep scarlet color, mild taste. You will like it.

ICicle—25 days. About 5 inches long, white brittle and has mild flavor, well liked.

Black Spanish (Winter)—60 days. Outside color black, flesh white, 8 inches long. Planted very extensively for winter production.

Chinese Rose (Winter)—30 days. Stump rooted, bright deep rose color, 3 inches in length, one of the best winter radishes.
PUMPKINS

GREEN STRIPED CASHAW

Culture—Southern States, planting time: Spring, March to July. Usually planted in cornfields; when grown as separate crop, plant in hills (10 seeds to the hill) 8 to 10 feet apart each way. When started, thin to 3 or 4 plants. When leaves die, cut pumpkins from vines, leaving 3 to 4 inches of stem and store in dry place; avoid bruising. One pound to 300 hills, 4 pounds to an acre. Approximate number of days to edible condition is given after each variety. This varies with climatic and soil conditions.

CONNECTICUT FIELD—120 days. Large, smooth, oval-shaped, orange yellow color, very productive. Grown extensively throughout the South, mainly in cornfield, splendid for table and feeding stock.

GREEN STRIPED CASHAW—90 days. Large white with green stripe, with crooked neck, flesh light yellow, thick, coarse, but sweet. Planted more extensively in the South than any other variety. One of the best for pie making and excellent keeper.

LARGE CHEESE—103 days. Bright orange color, shaped like a cheese, very large and indented top and bottom. Excellent quality, well liked wherever grown.

GOLDEN YELLOW MAMMOTH—100 days. Bright golden yellow skin, thick flesh, excellent quality, splendid keeper. Weight 50 to 80 lbs., cannot be beaten as a pie pumpkin and for stock feeding.

JAPANESE PIE—105 days. Skin deep green, darker stripes turning to yellow as the fruit ripens. Flesh thick, rich salmon color, dry and sweet, makes splendid pies.

SMALL SUGAR—118 days. Deep orange yellow skin, averaging 10 inches in diameter, flesh fine-grain, sweet and excellent keeper; a favorite for table and stock feeding.

TENNESSEE SWEET POTATO—85 days. Sweet potato flavor, pear shaped and slightly ribbed, good keeper, flesh light color and sweet. Very productive.

SPINACH

Culture—Planting time, Southern States: Spring, January to June; Fall (main crop), September to December. Plant 3 ounces to 150 feet of row, 10 pounds per acre. Sown broadcast in fields or in rows about 12 inches apart (small gardens). There are no better greens produced than Spinach. Rich, moist ground is best and grows better when season has cool nights. Approximate time to edible condition is given after each variety. This varies with climatic conditions and soil.

BROAD LEAVED FLANDERS—70 days. Very large, broad leaves, grows erect, very extensively grown, fine flavor.

EXTRA LARGE LEAVED SAVOY—60 days. Very large, thick leaves, slightly curled. The best and most extensively grown variety for market.

OLD DOMINION—40 days. A savoy leaved Spinach, compact dark bluish green, heavily crumpled except at the leaf end tip. Blight resistant, withstands heat and cold. Highly recommended.

NEW ZEALAND—90 days. Dark green, thick succulent leaves. Heat resistant, grows well all summer, very popular.

NOBEL GIANT LEAVED—The best smooth leaved sort. Produces a large mass of very thick rounded leaves of enormous size, a quick grower and stands very long before bolting. "Nobel" is an ideal variety for truckers and canners.

VIROFLAY—Desirable for canning as leaves grow clean and upright, and are broad and pointed at end.

UNCONN

Culture—Planting time, Southern States: Spring, March to July; Fall, August to November. Plant 11/2 ounces to 150 feet of row, 4 pounds per acre. Prepare hills by mixing well rotted manure in each hill and pulverizing thoroughly. Planted 6 to 8 seeds in each hill. Summer varieties, hills should be 3 feet apart each way, winter varieties 6 to 8 feet. When well started thin to 3 plants to each hill. Do not bruise when gathering. The approximate number of days to edible condition is given after each variety. This varies, due to climatic and soil conditions.

EARLY WHITE BUSH or PATTY PAN—53 days. Vine dwarf in habit, produces round scalloped squash 4 inches thick and about 9 inches in diameter. The most popular variety in the South.

COCOZELLE or ITALIAN GREEN STRIPED—90 days. Fruit somewhat shaped like a Banana Canoe, 12 to 15 inches long and about 5 inches thick. When young, dark green, afterwards light yellow. Excellent for slicing and drying like eggplant.

GIANT SUMMER STRAIGHTNECK—55 days. An improvement on the Crookneck variety. Fruits are thick, heavily warty, straight and bright orange yellow color. Highly recommended.

LONG YELLOW or SUMMER CROOKNECK—80 days. Produces crooked shaped yellow squash. Thick, fine quality flesh. Very popular.

ZUCHINI—60 days. An increasingly popular sort of the Italian marrow group. Fruits weigh 3 to 4 pounds, nearly cylindrical, and straight. Color medium green, mottled with creamy-grey and lighter green stripes. Flesh firm and delicately flavored.

UCONN—75 days. A recently introduced bush type squash with acorn shaped fruits similar to Table Queen but smaller. Fruits are smooth, light green, becoming orange when over mature.

BUTTERNUT—95 days. Early maturing and good keeper. Fruits 10 to 12 inches long with neck about 1.5 inches. Skin light creamy brown; flesh yellow, fine grained and fine quality.

STECKLER SEED COMPANY, Inc., NEW ORLEANS, LOUISIANA
TOMATOES

Culture—Planting time, Southern States: Spring, December to March, in hotbeds, open ground, to June, Fall, September to October, in open ground. Plant 1/2 to 1 foot of row. One ounce will produce about 5000 plants. Transplant from hotbed when plants are 6 inches high to open ground, 3 to 4 feet apart each way. Tomatoes require rich, well pulverized soil. If danger of frost is not over when transplanted, plants must be covered at night whenever there is danger of frost. To protect them from insects dust with Arsenate of Lead, powdered form, about 2 weeks after transplanting and at 2-week intervals thereafter. Approximate number of days from time of planting seed to edible condition is given after each variety. This varies due to climatic and soil conditions.

PONDEROSA—125 days. Very large, very firm, crimson color, few seeds, prolific producer, one of our best varieties.

LOUISIANA ALL SEASON—80 days. A cross between Louisiana Pink and Break-O-Day. Produces a heavy early yield of uniform sized fruits. Globe shaped and medium in size.

JEFFERSON—Vigorous, prolific and wilt resistant. Fruit smooth, globe shaped and dark red in color.

OX HEART—The home gardener who delights in introducing usually good things into his neighborhood will be amply repaid by including Ox Heart in his garden plans this spring. Among large fruited tomatoes this variety is unique. In form is distinct, since it is almost exactly the shape of a heart as the name implies, and single fruits sometimes weigh more than two pounds.

BREAK O' DAY—One of the wilt-resistant varieties. An early tomato resembling Marjube but of higher scarlet color and not so distinctly globe shaped. It is slightly earlier than our stocks of Marjube. The vines are vigorous and productive. Planted extensively in trucking districts and gives excellent results.

BRINNER—60 days. A pink fruited variety; similar to Ponderosa. Fruits large, flat and rough, small seed cells, of inviting color. Seeds of Mignonette seedling type.

CERTIFIED MARJUBE—79 days. Plants vigorous with heavy foliage, resistant to wilt and rust; moderately productive. Fruits medium large, globular, smooth, solid with thick walls and cross sections, a fine variety.

DWARF CHAMPION (Tree Tomato)—Dwarf and compact growing plants, stems thick and short. Extremely hardy and can be set out very early. Purple-pink color, medium size and quality and excellent variety.

GROTHEN'S GLOBE—70 days. A new early maturing wilt resistant variety. Fruits deep scarlet and free from objectionable yellow about the stem end.

LOUISIANA DIXIE—74 days. Originally bred from Louisiana Pink. Resistant to wilt and early blight. Fruits are medium to large in size and globe shaped. Fruit is a very good pink color, does not crack, prolific producer.

LOUISIANA GULF STATES—77 days. A highly refined variety of the ordinary Gulf States Market. Vigorous growing, high in yield, and will resist wilt. Color is a good pink, globe shaped and resistant to cracking.

LOUISIANA PINK—Same as Louisiana Red, except in color.

LOUISIANA RED—Wilt resistant tomato, medium size, small seed cavity, heavy bearer, fruits borne in large clusters and almost globe shaped.

NEW PRITCHARD—A scarlet, self topping disease resistant variety. Fruits large, smooth, globular, solid with thick walls and cross sections. Free from cracking and the quality is much superior. An excellent variety. Matures only a few days later than some early varieties.

RUTGERS—77 days. Extensively planted for shipping purposes. Large, uniform, purplish pink variety, globe shaped and free from cracks and blemishes. Firm skin, smooth and solid with few seeds. This variety is resistant to blight and matures uniformly.

SPARKS EARLIANA—100 days. Large red, smooth tomato, nearly round, foliage small, grown extensively for canning. Highly recommended for all purposes.

PEAR-SHAPED YELLOW—Similar to Red Pear-Shaped except in color.

PEAR-SHAPED—100 days. Pear shaped, small size fruits, good quality.

SET early tomato blooms and get 20% to 30% additional crop with FIX. Large, well-shaped seedless fruit. Also makes, cucumbers, squash. Newest achievement of agricultural science.

ROQUETTE or Rocket Salad

Culture—Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 1/2 ounces to 150 feet of row. Sow 15 inches each way. Leaves are used for salads, similar in 10c; 1 lb. $5.00, postpaid.

SALSIFY or OYSTER PLANT

Culture—Planting time, Southern States: Spring, January to June; Fall, August to December. Plant 1/2 ounces to 150 feet of row. Sow in rows 10 inches apart. Grown in both large and small Southern gardens, Edible condition 150 days after planting. Taste similar to oysters.

SANDWICH ISLAND—Pkt. 10c; oz. 50c; 1/4 lb. $1.35; lb. $4.00, postpaid.

SORREL (Broadleafed)

Culture—Planting time, Southern States: Spring, January to April; Fall, September to November. Plant 1/2 ounces to 150 feet of row. Sow in rows one foot apart. Used like Spinach as well as in salads and in soup. Edible condition about 45 days after planting. Planted in many small gardens throughout the South.

SORREL (Broadleafed)—Pkt. 10c; oz. 45c; 1/4 lb. $1.50; lb. $4.00, postpaid.

ACME TOMATO DUST

Many common spraying and dusting materials are irritating to tomato plants, causing rapid respiration so that they lose moisture more quickly than the plant wants to. Acme Tomato Dust is especially formulated for tomatoes, controlling Blight and worms and permitting best possible harvest.

1 lb. 90c; 4 lb. bag $1.90.
--- RUTABAGA ---

Culture—Same as for Turnips.

IMPROVED PURPLE TOP RUTABAGA—80 days. Oblong shape, yellow flesh, very solid, used extensively for table and stock feeding.

--- VEGEITABLE PEAR ---

CHAYOTE or MERILTON

Culture—Planting time, Southern States: Spring, March to May. The Vegetable Pear makes an excellent dish whether creamed, fried, stuffed, baked with cheese or salad. It is grown on a long ornamental vine similar to the goji, to which family it belongs. The vine is usually trained on a trellis or fence. Plant the entire plant with broad ends, leaving small and slightly exposed. Never plant less than two for successful results of production.

VEGETABLE PEAR (Chayote or Merilton)—
Each 45c; dozen $4.50, postpaid.

--- WHITE SHALLOTS ---

Culture—Planting August to March. For home consumption and Northern markets. 6 bushels per acre in 4 foot rows. The quantity to be expected from an acre, if planted in field culture, 4 foot rows, would be from 50 to 60 barrels, but if planted, as is done near New Orleans, in 2 foot rows, 100 to 125 barrels if planted in August and September. If planted later, they do not multiply so well.

WHITE SHALLOTS—
Lb. 60c; 3 lbs. $1.85, postpaid. Write for prices on larger quantities.

--- TOBACCO ---

Culture—Tobacco in this part of the country should be started in a hotbed in March and treated same as tomatoes. One ounce, 5000 plants.

--- CONNECTICUT SEED LEAF ---

A well known American variety.

IMPROVED HAVANA—We import from one of the principal growers the finest and purest strain of Vuelta de Aboyo, which is considered the best of Havana varieties.

--- VEGETABLE PLANTS ---

Home Grown

Ready October 15 to February 15.

Early Flat Dutch. Succession and Copenhagen Market Cabbage Plants.
75c per 100; $5.00 per 1,000, postpaid.

Onion.
60c per 100; $3.00 per 1,000, postpaid.

Cauliflower Plants.
35c per doz.; $1.50 per 100, postpaid.

Artichoke Plants.
$1.65 per doz., postpaid.

The following ready from March 15 to May 15:

Eggplant, Pepper and Tomato Plants.
35c per doz.; $1.50 per 100; $7.50 per 1,000, postpaid.

(Do to conditions of delay in transit, transportation of all plants sent at purchaser’s risk.)

VELVET and SOY BEANS for Fertilizer

Planting Time, Southern States. March to August

BILOXI (Soy)—Bush grows upright 5½ feet wide and very lanky. Beside producing excellent food for grazing and hoggling do duty in the preparation for ensilage, it is one of the best fertilizing plants in existence. We recommend this variety very highly. 6 to 8 pounds will plant one acre in rows 3 feet apart. 1 to 2 inches deep. 60 lbs. per bushel.

1 lb. 50c; 2 lbs. 85c; 5 lbs. $2.00, postpaid.

EXTRA EARLY SPECKLED VELVET or 90 Day—Preferred by stock raisers and very heavy foliage. Heavy producer of short, well filled pods. No better soil fertilizer plant can be found. This variety is known and recognized as the best for all purposes. Plant 1 peck to 1 acre in rows 4 to 5 feet apart. 60 lbs. per bushel.

1 lb. 50c; 2 lbs. 65c; 5 lbs. $2.25, postpaid.

MAMMOTH YELLOW (Soy)—Vines bushy, vigorous, erect habit. Sow broadcast a half bushel to one acre or ½ bushel apart in rows 3½ feet apart. An excellent and popular variety. 60 lbs. per bushel.

1 lb. 50c; 2 lbs. 95c; 5 lbs. $2.25, postpaid.

OTOOTAN (Soy)—A very fast growing plant, growing 4 to 5 feet high, fine stems and delicate leaves. Curves quickly, makes hay of finest texture and very fine quality. It leads the field in heavy growth and can fill the field, or if given a chance, it makes a heavy hay. A half peck per acre, 2½ to 3 feet between the rows. Extensively used throughout the South. 60 lbs. to the bushel.

1 lb. 55c; 2 lbs. 95c; 5 lbs. $2.10, postpaid.

AVOYELLES—Developed in Louisiana, grows very similar to Otootan, sometimes called Improved Otootan. Seed are much larger — the worms past year in Louisiana did no damage to Avoyelles but ruined the Otootans.

1 lb. 50c; 2 lbs. 85c; 5 lbs. $2.00, postpaid.

DWARF ESSEX RAPE

DWARF ESSEX RAPE—For Spring, Fall or Winter planting for quick green forage or grazing for hogs and poultry, there is nothing equal. Can also be used on the table as a substitute for “turnip greens.” Tops look like Rutabagas and growth is similar yet larger. Rape makes no bulbous roots. Can be planted in rows like hips, 20 pounds per acre, or broadcast, 8 to 10 lbs. to the acre. 60 lbs. to the bushel.

1 lb. 50c; 5 lbs. $2.00, postpaid.

JAPANESE BUCKWHEAT

Culture—Plant in the Spring or Fall, matures in 8 to 10 weeks. Sow one bushel to the acre. Steckler’s Japanese Buckwheat grown for poultry feed: makes in bloom excellent for honey bees; early cultivated and generally grown.

1 lb. 45c; 2 lbs. 80c; 5 lbs. $1.40, postpaid.
Especially adaptable
to the South.

FODDER AND
GRAIN CROPS

FETERITA—This is 10 to 15
days earlier than Kaffir Corn,
makes good fodder, and makes
an excellent yield of grain with¬
out having received any
rain for days preceding. It was
planted in February. 15
pounds per
acre. Planted from March to
May.
1 lb. 45c; 5 lbs. $1.50.
post-paid.
Write for quantity
prices.

MILIO MAIZE (Yellow)— Splendid
non-saccharine sorghum for
seed crops. Planted in rows 4
to 5 feet apart, sow 10 lbs.
per acre from March to Aug¬
ust.
1 lb. 45c; 5 lbs. $1.50.
post-paid. Write for quantity
prices.

WHITE EASTERN CORN— Makes
excellent fodder, keeps green
and brittle. For grain, sow
10 lbs. per acre in rows 3 feet
apart. For fodder, sow 1/2
to 1 bushel either broadcast
or in drills. Planted March to
June.
1 lb. 45c; 5 lbs. $1.50.
post-paid. Write for quantity
prices.

EGYPT—Earlier than
Kaffir corn or Feteria, dwarf in
growth with large heads of
wheat, sows, and a shorter day.
Well. Plant 9 to 10
pounds per acre in drills.
1 lb. 50c; 5 lbs. $1.50.
post-paid.

EVERGREEN BROOM CORN—One acre will
produce 500 lbs. of brush and nearly 40
bushels of seed which is used for feed.
Plant and cultivate similar to corn. Sow
March and April in rows 3 1/2 feet apart,
plant 6 inches apart in rows. Requires 20
pounds per acre. We recommend planting
of more Broom Corn.
1 lb. 65c; 5 lbs. $2.75.
post-paid. Write for quantity
prices.

EGYPTIAN WHEAT (Shalla)— Properly belongs
to the non-saccharine sorghums, excellent
for food for poultry and all stock on the
farm. Thrives in Spring and early Summer.
Sow 20 pounds per acre from February to July.
1 lb. 50c; 5 lbs. $2.00.
post-paid. Write for quantity
prices.

SUNFLOWER

MAMMOTH RUSSIAN— Heads often measure
from 12 to 15 inches in diameter containing
an immense amount of seed, which is
used for poultry feed, planted in Spring.
5 pounds per
acre.
Pkt. 10c; 1 lb. 55c; 5 lbs. $3.50.
post-paid. Write for quantity
prices.

LADINO CLOVER

Low average cost because so little required
per acre. Sow 1 to 2 lbs. with other clovers
or grasses. If sown alone and thick stand
wanted first season use 3 to 4 lbs. Do not
plant deep, not over 1/4 inch.
Excellent for pasture and hay. Quick
recovery after grazing. Soil builder, furnishes
nitrogen to land.
Price: 1 lb. $1.35.

OATS

RED RUSTPROOF OATS (Recealed) —This
is an excellent variety, very popular
throughout the South and Southwest.
Produces large heavy heads, full of excellent
quality oats.
Price: Peck 75c; Bu. $2.00. F.O.B. New
Orleans.

PEANUTS

PEANUTS

ABRUZZI—This variety holds the reputation
of yielding 10 to 15 bushels more per
acre than other varieties. Plant 1 1/4
bushels per
acre from September to December.
1 lb. 40c; 5 lbs. $1.50.

WHEAT

ABRUZZI—This variety holds the reputation
of yielding 10 to 15 bushels more per
acre than other varieties. Plant 1 1/4
bushels per
acre from September to December.
1 lb. 40c; 5 lbs. $1.50.

WHEAT

ABRUZZI—This variety holds the reputation
of yielding 10 to 15 bushels more per
acre than other varieties. Plant 1 1/4
bushels per
acre from September to December.
1 lb. 40c; 5 lbs. $1.50.

WHEAT

ABRUZZI—This variety holds the reputation
of yielding 10 to 15 bushels more per
acre than other varieties. Plant 1 1/4
bushels per
acre from September to December.
1 lb. 40c; 5 lbs. $1.50.

acre than other varieties. Plant 1 1/4
bushels per
acre from September to December.
1 lb. 40c; 5 lbs. $1.50.
HARDY GRASSES FOR HEALTHY PROFIT

We have the finest and best assortment of field and lawn grass seeds offered in the South. These selected varieties are grown for us by the best growers in the United States. Our 100 years of experience is behind our selection of seeds and growers.

BERMUDA GRASS—Plant from February to September, 20 lbs. per acre for lawns and 30 lbs. for golf courses. This is a much coarser grass than Bermuda but will stand drought and hot weather better and also stays green longer in the fall. It is a natural perennial in Louisiana. It is used extensively in lawns, golf courses, fairways and parks. It stands more shade than Bermuda. Takes about 30 days to start. Carpet Grass is also used extensively for lawns and pastures in the South.

1 lb. 75c; 5 lbs. $2.75, postpaid.

CARPET GRASS—Plant from February to September, 20 lbs. per acre for lawns and 30 lbs. for golf courses. This is a much coarser grass than Bermuda but will stand drought and hot weather better and also stays green longer in the fall. It is a natural perennial in Louisiana. It is used extensively in lawns, golf courses, fairways and parks. It stands more shade than Bermuda. Takes about 30 days to start. Carpet Grass is also used extensively for lawns and pastures in the South.

1 lb. 85c; 5 lbs. $3.35, postpaid.

HULLED BERMUDA—Germinates within 15 days with proper moisture conditions. Highest grade of Bermuda with hulls removed, which insures quick results and nice green lawns. Sow 1 to 2 lbs. to each 1,000 square feet.

1 lb. 95c; 5 lbs. $3.55, postpaid.

JOHNSON GRASS—Perennials with cane-like roots. Hogs are very fond of this. Requires 1 to 1 1/2 lbs. per acre. Grows anywhere corn will grow. Should be cut when tender and livestock will relish. Once planted cannot be eradicated. Requires March and April.

1 lb. 60c; 5 lbs. $2.50, postpaid. Not prepaid. 10 lbs. $3.00; 25 lbs. $7.00.

DALLIS GRASS (Paspalum dilatatum) Imported Strand—A perennial, especially popular in the South. Grows 3 to 5 feet high, starting early in spring and remaining green until frost. Fills vacant spaces and hay on a wide variety of soils, but prefers heavy and somewhat moist land. Sow in March or April, or earlier in the far South. 6 to 8 lbs. to the acre.

1 lb. $1.55; 5 lbs. $7.00, postpaid.

RED TOP—Reclaimed. Perennial, height 1 to 2 feet. Does well on low, wet lands. This is an excellent pasture and hay grass. An excellent variety, 30 pounds per acre. Sow from October to February.

1 lb. $1.45; 5 lbs. $6.00, postpaid.

DOMESTIC ITALIAN RYE GRASS—Grown in the United States from the imported Italian and English. Used extensively today in America for lawns, golf courses, meadows and pastures and is claimed to be harder than the imported varieties. Slightly darker and coarser than the Italian grass. Grows well on the southern lawns. Requires 300 pounds to the acre on lawns and golf courses and 40 to 50 pounds for pastures.

1 lb. 45c; 5 lbs. $1.45, postpaid. Not prepaid. 10 lbs. $1.50; 100 lbs. $13.50.

SUDAN GRASS—Grows vigorously and quickly. Yields more tonnage per acre than any other forage crop. Plant 15 pounds per acre. March and April for Fall and September for Fall.

1 lb. 50c; 5 lbs. $2.00, postpaid.

KOREAN LESPEDEZA

Korean is one of the best clovers that can be planted in the South. Plant at the rate of one bushel to the acre from December to May. If some on

KOBELLESPEDEZA

Koehas certainly earned a home for itself on Southern farms, particularly where long periods of drought come, as Koehas have come through those droughts where Common Lespedeza was burned out. The drought resistance is a life-saver to a farmer, and is no doubt due to the very extensive root system and its rank growth, with larger than ordinary leaves. We have seen Koehas 38 inches tall but usually it is 2 to 2 1/2 feet tall. We have seen yields of 4 tons per acre with Koebes. It is excellent for hay and pasture alike. Can be sown with oats, also with orchard grass and red top or hard's grass.

1 lb. 60c; 5 lbs. $2.50, postpaid.
ALFALFA

HAIRY PERUVIAN ALFALFA—Sow 30 pounds per acre, from January to April for Spring and September to November for Fall. Withstands colder weather better than Alfalfa or Lucerne and usually produces a heavier yield of hay. A perennial plant. We highly recommend this variety for hay and pasture.

Lb. 80c; 5 lbs. $3.75, postpaid.

ANNUAL YELLOW BLOSSOM SWEET CLOVER—Also spoken of as "Sour Clover." A valuable winter legume for the lower South. Grows 2 to 3 feet tall and produces 5 to 10 tons of green matter by early May. Will reseed itself if cut when seeds start maturing. It thrives on all kinds of soil and grows rapidly and abundantly. Sow during the early fall or spring at the rate of 20 pounds per acre if used alone. Inoculate seed for best results with NITRAGIN.

Lb. 40c; 5 lbs. $1.60.

BAHIA GRASS—Pensacola. This grass is as good as any if grazed while young or kept heavily grazed. Stands more cold and dry weather than any other summer grasses. Will thrive on any kind of land. Narrow leaf, having a heavy deep fibrous root system. Sow 10 to 20 pounds per acre.

Lb. 80c; 5 lbs. $3.25, postpaid.

Hairy, Winter or Sand Vetch

CULTURE—Plant from August to November or early Spring with small amount of Rye, Oats, Wheat or Barley. Sow 40 lbs. per acre. Makes an excellent hay crop and is very popular throughout the South. A good soil improver.

STECKLER'S Hairy, Winter or Sand Vetch.

Price: Lb. 45c; 5 lbs. $1.60, postpaid.

THE CYCLONE SEED SOWER

Saves Labor
Saves Seed
Uneven seeding is wasteful.

The CYCLONE will sow many acres per hour, any amount per acre. Does the work quickly.

BROADCASTS EVENLY

$4.50 each, postpaid

CROW REPELLENT

It protects your corn plantings by keeping off crows, larks, blackbirds and other corn-pulling birds, as well as moles, woodchucks, squirrels, etc. Does not clog the planter; protects the corn from rotting. Not poisonous and will not injure the seed.

By mail postpaid, 1/2 pint (enough for 1 bushel corn) 75c; pint $1.15. Not postpaid, 1/2 pint 60c; pint $1.00.

CROTALARIA SPECTABILIS

World's Best Cover Crop. Build up your soil with this new legume. This new legume produces more humus and more nitrogen per acre than any other crop. It is not a pest and can be easily eradicated and reseeded itself each year under favorable conditions. It is used as a summer cover crop and soil builder in groves, orchards, vineyards, etc. Livestock will not eat it, therefore you will not be tempted to cut it for hay when your ground needs it so badly. This should be planted as soon as danger of frost is past and at a time when there is plenty of moisture in the soil, and can be planted as late as July, either broadcast or drilled. Ten pounds of seed is required per acre for broadcasting, and half of that amount if drilled. Grows from 5 to 10 feet depending entirely on the locality.

1 lb. 60c; 5 lbs. $2.55, postpaid. Write for quantity prices.

COMMON VETCH—Prefers sandy loam, well drained, but will produce a good crop on almost any other soil where water does not stand. Requires 30 to 40 pounds per acre. Seed should be inoculated with NITRAGIN.

Lb. 45c; 5 lbs. $1.65, postpaid.

STRAWBERRY SHOOKS or DIRT BANDS

STRAWBERRY SHOOGS or DIRT BANDS—Easy plants, muskmelons and early cucumbers pay well if they come early into the market. In order to have them early, it is a good plan to start them in a cold frame in what are called "Dirt Bands." This is a box 4 inches square and 4 inches deep, without bottoms. These are placed in a frame and filled with good rich soil, and five or six seeds in each box. When the plants come up, thin them out to one or two in each box. Before using dirt bands, wet them thoroughly before handling or they will be apt to break at the grooves, as they are made of thin veneered wood.

$2.25 per 100; $4.50 per 1,000. Not prepaid.

ARASAN

Seed treated with Arasans is protected against many seedling diseases. Seedlings are healthy and vigorous. In the Corn Belt showed that Arasans increased stands by 5% to 15%.

8 oz. can $1.00.
Surround Yourself with Beauty

Enjoy the beauty of lovely flowers and at the same time get that relaxation of mind and body that working in a flower garden gives you. It's an easy way to keep up your morals and get away a little while each day from the cares of a troubled world. Try it! You'll be glad that you did.

Plan your Flower Garden to give you colorful, fragrant blooms the full length of the season. Planting early and later varieties in the same area will help accomplish this. Have some Annuals and some Perennials. If you have been missing the pleasure of flower gardening, start this Spring. It's lots of fun!

All flower seeds in packages mailed postpaid.

**AGERATUM** (Midget Blue)—Only 3 to 4 inches tall, has an excellent spread of about 12 inches, freely producing tiny tufts of true ageratum-blue flowers. A decidedly compact dwarf variety, valuable for edging, rockeries and pots. Pkt. 25c.

**ALTHEA ROSEA** (Roly poly)—October until April. Very hardy. 4 to 6 feet high. Pkt. 10c; oz. $2.50.

**ALYSSUM** (Little Gem, Sweet Alyssum)—Free flowering; six inches high; white flowers, very fragrant. October till April. Pkt. 10c; oz. $1.50, postpaid.

**ALYSSUM** (Violet Queen)—A distinct variety, with delicate lavender flowers. Pkt. 10c; 1/2 oz. $1.00.

**ALYSSUM** (Royal Carpet)—New rich violet purple, compact and spreading. Pkt. 25c; 1/4 oz. $1.75.

**ALYSSUM** (Saxatile Compactum) (Gold Dust)—Golden yellow, grows to about 12 inches. Pkt. 10c; 1/4 oz. 65c.

**AMARANTHUS** (Joseph’s Coat)—Very showy; cultivated on account of its leaves, which are green, yellow and red. Two to three feet high. April till August. Pkt. 10c; 1/3 oz. $1.35.

**AMARANTHUS** (Molten Fire)—Dwarf leaves dark bronze, red center, very beautiful. Pkt. 10c; 1/3 oz. $1.25.

**AQUILEGIA** (Columbine)—Long-spurred hybrids mixed. Prefer partly shaded location. Sow during January to March. Height 2 1/2 feet. Pkt. 25c.

**ARCTOTIS** (African Daisy)—A very fine annual. Its flowers are large and showy, being pure white on the upper surface, the reverse of petals pale lilac blue. It can be started in hotbeds or in the open ground and will come in bloom in early July. Pkt. 10c; oz. $1.50.

**ARMERIA** (Thrift, Sea Pink)—Dwarf-growing perennial with grassy leaves and a tufted habit of growth. The flowers are borne in globular heads during March to May, and the plants are suitable for edgings to borders. Pkt. 15c.

RED JERZY—(I. D.) Immense flame scarlet red, prolific bloomer, large size, fine for exhibition.
65c each, postpaid.

BERGER’S MASTERPIECE (Cactus)—Lavender-pink, yellow blend at base.
75c each, postpaid.

THOMAS EDISON—(F. D.) A very uncommon shade, outer petals at maturity are bright violet blue, while the center retains the violet tints. The nearest to a blue Dahlia.
75c each, postpaid.

WHITE WONDER—(Dec.) A splendid giant variety with broad, wavy white petals which form a most perfectly shaped flower.
65c each, postpaid.

THE COMMODORE—(I. D.) Coppery yellow and gold, very fine and best in this color.
60c each, postpaid.

GALLANT FOX—(F. D.) A good commercial red, very fine keeping qualities, sturdy stem and fine color.
55c each, postpaid.

J. MARION—(F. D.) Ruby red, large flower and makes a vigorous bush.
75c each, postpaid.

ROYAL PENNANT—(I. D.) Rich violet purple. Huge blooms can be grown to immense size and are fine keepers, strong growers and disease resistant, with striking foliage on good stems.
75c each, postpaid.

WATCHING GIANT—(I. D.) Light lemon yellow. A popular show variety.
60c each, postpaid.

GOLDEN LEADER—(I. D.) Giant clear yellow, splendid grower on long stiff stems.
75c each, postpaid.

CARDINAL—(Pom.) Solid red, small flower of perfect shape and with good stems.
45c each, postpaid.

MORNING MIST—(Pom.) Soft pink with lavender shading. Low growing bush, medium size flowers on good stems.
45c each, postpaid.

MARY MUNNS—(Pom.) Lavender, considered as the best of this type, small flower of perfect shape and a prolific producer.
45c each, postpaid.

GOODRICH EOROSEAL GARDEN HOSE—Light in weight—Re-attachable couplings—25 ft. $6.10; 50 ft. $10.15, postpaid.

CLIMBING VINES

ANTIGONON LEPTOPUS (Rosa Montana, Mountain Vine)—One of the finest perennial climbers of rapid growth with long stems of beautiful deep pink flowers. Sow in February to June in the open ground. Will flower freely the first year. Pkt. 10c.

CARDINAL CLIMBER—Very attractive, strong and rapid grower. Produces fiery cardinal red flowers from midsummer to frost. Does well in the warm, sunny garden. Very fine, deep rich soil. Planted March to June. Pkt. 25c.

CONVOLVULUS MAJOR (Morning Glory)—Mixed. A well known vine with handsome colored flowers of easy culture. Grows almost anywhere. Ten feet high. February to July. Pkt. 10c.

KUDZU VINE—A leguminous vine somewhat resembling the Velvet Bean in appearance. It is perennial and comes from the root each spring and makes as much growth by about the middle of July as the Velvet Bean makes in an entire season, and that on ordinary soil, without fertilizer of any kind. When once established Kudzu thrives as well on the poorest sandy upland as on the best lands. The nitrogen is taken from the air, and consequently is a soil improver. Kudzu may be cut from two to four times during the season. Plants February to July. No seed to offer. Pkt. 20c.

IPOMOEA (Scarlet O’Hara Morning Glory)—Early flowering, salmon pink, sometimes called carmine, medium size blooms until frost and stays open longer than most Morning Glories. Foliage is quite distinct, heart-shaped with one large and two small size lobes. Pkt. 10c; ½ oz. 65c.

IPOMOEA QUAMOCIT ALBA (White Cypress Vine) The same as the red variety. February to June. Pkt. 20c.

IPOMOEA HEAVENLY BLUE (Improved Morning Glory)—Deep blue, intense blue, shading lighter towards the center. The flowers are large and freely produced and plants do not make rapid growth early in the season. Pkt. 10c; ½ oz. 50c.

IPOMOEA QUAMOCIT ROSEA (Red Cypress Vine, flowering red) Twenty feet. February to June. Pkt. 20c.

IPOMOEA BONANAX (The Blue Moonflower)—This distinct and charming novelty is valuable on account of being in beautiful and striking contrast with the White Moonflower. February to June. Pkt. 10c.

IPOMOEA NOCTIFLORA—Large flowering Evening Glory, very similar to the White Moonflower. A vine of rapid growth with beautiful, delicate foliage of rapid growth, with white flowers. February to June. Pkt. 10c.

GIANT IMPERIAL JAPANESE MORNING GLORY—Mixed. The vines are of robust growth, attaining a height from 30 to 40 feet. The foliage varies greatly, some plants having yellow or silver foliage, while others are bluish and mottled. February to July. Pkt. 10c.

MORNING GLORY (Pearly Gates) All-America winner. Lovely lustrous white with creamy shading deep in throat. Average 4 to 4½ inches across. Bloom from middle summer to frost, to 3 or 4 ft. high.

THUNBERGIA (Black Eyed Susan)—Lovely trailing plant with large showy flowers. Very pretty flowers in white, yellow, orange, etc., with dark eyes. Mixed colors. Planted during January to March. Pkt. 10c.

WISTERIA (Blue)—This is one of the most popular of our hardy vines growing rapidly; in blossom it is truly magnificent, bearing long pendulous clusters of flowers; grows to a height of 50 feet or more. February to May. Pkt. 15c.

EUROPA—Creamy white blossoms with green foliage.
35c each; $1.25 per dozen, postpaid.
FLOWERING SHRUBS

MOCK ORANGE—Of upright growth reaching a height of about 5 feet. Very small, dainty leaves of a dark green color. Blooms early in the season. Will grow to beautiful white flowers. 10 to 24 in., $1.25 each, postpaid.

PINK HONEYSUCKLE—Exactly like the red bush except the flowers are small pink with an abundance of them. 2 ft. plants, $1.25 each, postpaid.

RED BUSH HONEYSUCKLE—A lovely plant of upright growth habit ranging in size from 3 to 5 feet. Small, dainty little leaves with an abundance of small red flowers followed by red berries make it one of the most loved plants grown in the nursery. 2 to 3 ft. $1.25 each.

RED FLOWERING PEACH—A large type of flowering tree with the same foliage as the fruit tree. It is beautiful when in bloom spring and fall. One of the finest plants to bloom in early spring with its large double red flowers. It is a solid mass of blooms. 2 ft. plants $1.75 each, postpaid.

DEUTZIA (Pink)—Large, double pink flowers with a shading of rose. Very hardy, attractive, and a beautiful pink flower. One of the finest plants to bloom in early spring. 2 to 3 ft. $1.15 each, postpaid.

FORSYTHIA—Erect growing, tall and slender. Exclusively double, very hardy, and attractive. Lovely golden flowers of rich yellow. One of the first shrubs to bloom. 2 ft. plants $1.15 each, postpaid.

VINES and CLIMBERS

ANTIGONON LEEPTUS (Rosier Montan or Mountain Rose)—A very beautiful vine, with pea-like flowers, pink or rosy red colored, in one of the most beautiful climbers grown in the Southern states and desirable. 2-year-old plants $2.50 postpaid.

BIGNONIA LAURIFLOWER—Evergreen glossy foliage, lavender flowers, finest vine for verandas, not subject to any insect pests. The finest evergreen vine for the South. Blooms in February when no other plant or vine in bloom. From 4-in. pots $2.50 each.

WISTERIA—For trailing over buildings, plazas, verandas or trellises, the decorative features which their long graceful blossoms afford, make a particularly pleasing effect. We have these in light blue and white. 24 in. $2.15 each, postpaid.

CHRYSAANTHEMUM

The Flower for All Saints Day for cemetery decoration. Planted any time after the ground can be worked up to July 1, will give good blooming plants in the fall. Our plants are ready March 1 and we recommend early planting for perfection of blooms.

Prices on the above: 20c each; $2.50 per dozen; $12.00 per 100, postpaid.

MOCK ORANGE

MOCK ORANGE—Has very large, heart-shaped dark green leaves and is covered with immense flowers that are sometimes as large as a saucer. These beautiful blooms cover the plant during the entire season. None.
Fruit and Nut Trees
Grape Vines

FIGS

FIGS.—Plant figs where they will not be disturbed and in rich soil, heavily manured.

BRUNSWICK or MADONNA—3 to 4 feet. Large purple fig, line in flavor.
Each $1.50, not prepaid.

CELESTE—3 to 4 feet. Medium size, purple to blue, very sweet and a favorite.
Each $1.25, not prepaid.

JAPANESE VIOLET—3 to 4 feet. About three times the size of the Celeste, very good and popular.

INSECTICIDES and FUNGICIDES

BLACK LEAF "40"—Excellent for killing plant lice, 1 oz. $3.00; 1 lb. $1.25; 1 lb. $2.29; 2 lbs. $3.75; 5 lbs. $7.45; 10 lbs. $13.25.

BLACK LEAF GARDEN DUST—Kills many of the common sucking and chewing insects and fungi diseases affecting flowers, vegetables and fruits. As a dust or spray. Postpaid, 1 lb. $1.25.

BLACK LEAF 1% ROTONE DUST—Controls Mexican Bean Beetle, Squash Bug, Mexican Bean Beetle, Colorado Potato Beetle, Spotted Cucumber Beetle and many others. Highly effective as a dust or spray. Postpaid, 1 lb. $1.55; 3 lbs. $2.80.

ACE ALL ROUND SPRAY—For roses, azaleas, other flowers, shrubs, vegetables and fruit trees. A new, modern, complexly formulated multipurpose product designed to provide with one application the best available protection against both insects and fungi such as rose chafer, azalea flower spot, spider mite, downy mildew, leaf spot, many rusts, Japanese beetle, leafhopper, flea beetle, carrot, cabbage worm and many others. Suitable for dusting as well as spraying. Postpaid, 1 lb. $1.35; 3 lbs. $2.80.

GARDEN GUARD—Don't let the bugs have your vegetables and flowers. Dust or spray with Garden Guard and enjoy the fruits of your toil. The killing ingredient is Rotone, non-toxic to humans and warm-blooded animals. Furthermore Rotone is very effective as it acts both as contact and stomach poison against a wide range of insects. Postpaid, 1 lb. 75c; 4 lbs. $1.65.

ACE LIME SULFUR (DRY) 10% CHLORDANE DUST—For dusting garden trees and on lawns to control ants, cutworms, chinch bugs, chiggers, scarabaeidae, slugs, saw-flies, bugs, sod webworms, wireworms, white grubs, Japanese beetle grubs, root infesting maggots and many others. Use in the home for: cockroaches, silverfish, carpet beetles, flies, ants & mites, etc. Postpaid, 1 lb. 75c; 4 lbs. $2.15.

ARSENE OF LEAD—Kills leaf-eating insects and lawn grasses. Kills millions. Lb. $1.00, postpaid.

BORDEAUX MIXTURE—A standard dry powdered fungicide for many diseases of orchard and garden plants. Lb. 95c, postpaid.

MALATHION 50% SPRAY. An entirely new spray for the control of mites, aphids, psylla and white flies. Lb. $1.95, postpaid.

PARIS GREEN—A rich emerald color and of fine, fluffy physical characteristics. Containing 55% arsenical, it is the quickest control where extreme measures are necessary. For use in the home, garden, tobacco; also to mix with Arsenate of Lead for fruit tree spraying where quick results are necessary. 

1/4 lb. 50c; 1 lb. $1.25.

CYANOGAS ANT KILLER—For ants in the garden and lawn. Kills millions. 65c, postpaid; 50c, not postpaid.

ACE WETTABLE DUSTING SULPHUR—An improved dusting sulphur for home use which can also be used as a liquid spray. Recommended to control mildew, leaf blight, mildew spot and rusts on rose bushes, chrysanthemums, ornamental currants and certain other foliage; also red spiders on evergreens. 98 per cent passes through 325-purpose screen. Postpaid, 2 lbs. 3 cent 95c.

ACME DIMITE

Red spiders and other mites often ruin evergreens, stunt blossoms and can even destroy fruit crops. These tiny forms, hardly distinguishable with the naked eye, reproduce in such unbelievable numbers that they can easily browse or suck juices from the host plant. Acme Dimite kills mites quickly and gives protection for several weeks.

2 oz. 75c, postpaid.

ACME DURADUST $50

A finely divided, wettable powder containing 50% technical DDT. Has many uses in control of insects in the garden, on fruit trees and in outbuildings. Kills both sucking and chewing insects on foliage, houseflies and mosquitoes by wall treatment. Most economical form to buy DDT.

1 lb. $1.00, postpaid.

HAYES 4 SPRAY GUN—Makes 4 gallons of mixed spray material at a time. Sprays liquid and most washable powders up, down and sideways. Attaches to your garden hose. Operates on water pressure from 30 to 75 lbs. No moving parts to wear out or break. Price complete. $6.45. Hayes 6—$9.95. Hayes 10—$12.95.

BRADSON Garden Hose Sprayers

Kill MORE Garden Pests
Use like a nozzle on the hose. Thoroughly drenches plants with a soft misty spray of insecticide or fungicide. Gets more on both sides of leaves, on more of the plant. For complete kill. As easy as sprinkling; no tiresome pumping, water pressure does the work!

A. Insect-O-Gun
Deluxe model, pistol grip, lifetime construction. Pint jar holds enough to make 6 gal. properly mixed spray.

$5.95

B. Gard-N-Gun
Sturdy yet inexpensive, 3 gal. capacity, ideal for small gardens.

$3.95

Both models: Spray liquid or powder, even things like Bordeaux mixture that clog ordinary sprayers. Easy, simple water control valve you need not hold on while spraying. Home replaceable jars. Clean in 30 seconds. Are guaranteed.

FOR FERTILIZERS and WEED KILLERS

C. Gro-Gun
Sprays any fertilizer or weed killer, powder or liquid that is mixed with water to apply. Home replaceable pint jar, filled, makes 20 gal. proper spray. One-finger control, cleans in 30 seconds, guaranteed.

$2.95

RUBBER KNEE PADS—Ideal for gardening. $2.50 pair.

FUME-OGEN

Repels dogs and ants—kills many soil insects—rids the home of ants.

Handy shaker cans—Patents Pending—Price, 50c.
Poultry Remedies and Supplies

Don Sung

Don Sung is always uniform in potency and strength, and is easily and economically given in the mash feed of hens. Don Sung is prepared in powdered form in a size to fit your flock. Complete directions for proper feeding and housing to promote better egg production, are included with every package. Get the trial size of Don Sung and see what it will do for your flock—your money will be promptly refunded if you’re not more than pleased with results.

Prices of Don Sung
50c Size (This is the Trial Money-Back size and is sufficient for 15 hens for 30 days) $1.00 Size (3 times the 50c size). $5 Size (3 pounds or 6 times the $1 size).

Black Leaf 40—Kills poultry lice. Simply pour the powder on the roosts while the chickens sleep. 1 oz. 5c; 5 ozs. 25c; 1 lb. $1.25; 2 lb. $3.25; 5 lb. $15.00.

"Black Leaf" Worm Powder—A flock treatment for round and pin worms in poultry. 1 oz. 5c; 5 lb: $1.50; 10 lb. $10.00 postpaid.

"Black Leaf" Worm Pellets.—If you prefer individual dosing, use the "Leaf" Worm Pellets. The uncoated pellets are odorless and tasteless, containing "shockless" nicotine in highly effective form. For 2-4 lb. chickens give one-half the easily broken adult size tablet.

Germzone

Germoxone is an antiseptic for both baby chicks and older birds. Helps prevent spread of disease germs. Astringent. Useful for individual treatment of birds with roop.

TONAX

For Growing Birds

Each drug in Tonax has been selected for a definite purpose. This combination of drugs makes Tonax ideally adaptable for year-round use.

Broiler men report better gains when Tonax is used. Turkey raisers tell of quicker development and better finished birds. Farm owners say Tonax carries their flock through the heavy laying season in fine shape. Try Tonax. You will like it.

Lemulsion

Cold, Wheezing

Lemulsion in the Mash

Many poultrymen still like to add Lemulsion to the mash in their drinking water. It can be conveniently used by first stirring the medicine into water or milk, and then pouring the mixture into the dry mash. A little mixing will give a clumpy, palatable feed. Specific directions will be found on the Lemulsion label.

VAPO-SPRAY

Spray in the Air—Treat the Whole Flock

VAPO-SPRAY is a combination of healing oils and insecticides. Both its antiseptic and insecticidal properties are valuable. It is sprayed in the air of the poultry house until a light mist is obtained. The beneficial oils are breathed by the fowls and volatile portions work gently through the air passages.

All forms of bacteria should receive immediate treatment with both Lemulsion and Vapo-Spray. Prompt action is urgent. Laryngotracheitis should not be forgotten. Spray and Lemulsion even if the fowls have been vaccinated.

Fowl Pox Vaccine

Used in the prevention of pox and its various forms such as sorehead, cankers, wet pox and diphtheric rot on fowls.

ACIDOX

For Cecidiosis

Anyone who has had a serious outbreak of Cecidiosis in his flock knows how bad it is. This form of Cecidiosis often causes a very heavy death loss, but other forms that do not show blood in the droppings are just as costly. In bad attacks of Cecidiosis, the lining of the intestines is severely damaged; sometimes so badly that there is bleeding.

Acidon is an acid preparation for chickens and turkeys. Used in drinking vessel for the care of birds with Cecidiosis.

4-oz. bottle 60c; postpaid. 90c; 12-oz. bottle $1.00; postpaid. $1.50 1-quart bottle $2.00; postpaid. $2.50.

Gizzard Worm Capsule

Worms do not have to rob a pallet of a lot of food to lower production. Take advantage of the fact that you can now worm your laying flocks with a Gizzard Capsule whenever necessary to reduce infestation.

PICKPASTE

For Canibalism

Pickpaste is blood-colored and mixes thoroughly with blood. It is repulsive to fowls. A few tastes of it usually teach birds not to pick at one another, unless the habit has become firmly established.

Pickpaste is greaseless and does not stick to wounds. It is antiseptic and prevents the wounds from dirt. It is effective in warm and cold weather, but washes readily from the hands.

Pickpaste can be obtained in convenient 6-oz. jars for 80c, or 65c, postpaid.

FOR HOUSEHOLD USE

Rats

RAT CONTROL is easy with this convenient product. It contains Warin, the anti-coagulant rodenticidal compound, plus specially-selected and processed grain that never becomes rancid or sour. Rats like it and continue to eat it until they die. Quickly destroys entire colonies.

Price: 1 lb. 80c. postpaid.

Flies and Ants

Superlative knockdown and quick kill with pyrethrins and activator. Excellent for roaches, clothes moths, crickets, silver fish and bedbugs. Spray five seconds to kill and lasts for 1000 cubic feet. Spray individual flies and watch them drop. Excellent for deadening flies—one treatment about 100 animals.

Price: 12 oz. $1.60. postpaid.

FLIES and Mosquitoes

Convenient and economical. Kills flies, ants, mosquitoes, lice, fleas, bedbugs, and similar pests. Spray five seconds per 1000 cubic feet of space. Sprayed doors and windows closed. Standard type of formula, contains DDT.

Price: 12 oz. $1.50. postpaid.

ROSES for Those Who Want Only the Best

**TALISMAN**

All Varieties—Grafted, $1.25 each; 6 for $6.60, postpaid

The roses listed are subject to our being able to supply. There are some varieties that may be sold out when your order reaches us; therefore, we will substitute the next best varieties in the color wanted.

**BUsh VARIETIES**

**White Hardy Garden Roses**

Caledonia—(H. T.) Long pointed white buds, double, an exquisite rose.

Kaisin Augustia Victoria—(H. T.) Pure white, with shadings of primrose-yellow.

F. X. Druschki—Large double white, also known as White American Beauty.

**Pink Hardy Garden Roses**

The Doctor—Bud very large, long pointed flower 4½ inches across, high center, lasting, moderate fragrance, rose-pink.

Radiance—(H. T.) Brilliant rose-pink buds opening in well-formed shining flowers with lighter tints on the reverse of the petals; globular in shape and very fragrant. The plant makes splendid growth, blooming in June, July, and August.

Briarcliff—(H. T.) Bud large, pointed, deep rose pink at center, passing to lighter on outer petals.

Editor McFarland—Shapely buds, double, pink blooms, produce bloomer. AARS.

**Yellow Hardy Garden Roses**

Golden Dawn—(T.) Pale, lemon-yellow, deepening in the center of its perfectly formed fragrant flower. Moderate growth and bloom. One of the hardiest and most beautiful Tea Roses; best in autumn.

Golden Charm—Strong, tall, free branching bush, long, bright yellow buds and always perfect. Chrome yellow in color.

Souvenir Theresa—Long pointed yellow buds, heavily marked with carmine; open flowers are rich daffodil yellow, very fragrant.

Eclipse—Chrome yellow, slender un-shaded, sometimes about two inches long. Vigorous, erect in habit and well foliaged.

**Tri-Colored Roses (Bush)**

President Hoover—(H. T.) The rose of wonderful colors. It is remarkable for its vigorous growth and beautiful colorings. A blend of orange and pink, varying in tone from copper-red in the bud, to glowing orange-yellow at the base of the petals, suffused with vivid rose pink.

Talisman—It is a combination of shades of gold, apricot, yellow, deep pink and old rose. The bud is long, well formed and develops into full double flowers. The plant is a strong grower, with glossy green foliage and fine flowering.

Condesa de Sastago—Glowing orange-scarlet on the inside of the petals and an intensely bright yellow on the outside, of very fine quality and good for cutting.

**ROSETONE**

Insures the success of your roses. Sack roots of bushes in Rosetone before planting. Water your established rose bushes for better growth.

1½-oz. packet 25c; 5-oz. package $1.00

**Red Hardy Garden Roses**

Crimson Glory—Beautifully shaped buds open into big flowers of velvety richly shaped bush, filled with fragrance, and very vigorous growing. AARS.

Etoile de Hollande—(H. T.) Bright crimson, fiery-red center cup-shaped. Frees in bloom.

Poinsettia—Color is a dazzling scarlet shading to deeper red; coordinator claims it never turns purple. Undoubtedly a fine red rose.

Red Radiance—(H. T.) An even better Rose than its predecessor. A true deep crimson, bearing blooming globular flowers of deep rose-red on strong, individual canes which are freely produced all summer until frost.

Better Times—(H. T.) Glorious red color, prized for its long stems and pointed buds. Large blooms. AARS.

**FLORIBUNDAS**

Floradora—Perfect camellia-shapped blooms of bright cinnamon-red. Very vigorous growth; free flowering. AARS.

Cecile Brunner—Beautiful little buds and very double, rose-pink flowers. An ideal buttonhole rose.

**Hardy Climbing Roses**

Cl. Etoile de Hollande—(H. W.) Red. A hardy disease-resistant variety; vigorous growth and great freedom of bloom.

Golden Climber—Innumerable deep golden-yellow flowers with the deepest, richest tea fragrance of all roses.

Paul’s Scarlet Climber—(H. W.) Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful climbing rose.

Cl. Red Radiance—(H. T.) Exactly like the bush variety of the same name except that it is of climbing habit.

Cl. Pink Radiance—One of the finest climbers in a good pink.

Cl. Talisman—Same as the bush variety, strong growing and free blooming.

Cl. Blaze—Marvelous hardy, everblooming scarlet red rose. Blooms from early spring until late autumn.

**Terra-Lite (Vermiculite Plant Aid)**

Aids in creating a dependable reservoir of plant root moisture; air-conditions the ground; forth to prevent cooking, packing and hardening; tends to reduce need for watering and cultivation; provides a satisfactory medium for cuttings, seedlings and young plants; ideal for strawberries, particularly dahlias and for vegetable winter storage. Postpaid 4-qt. pkg. 40c; ½-bu. bag 90c; 1 bu. bag $1.25; Not postpaid. 4-qt. pkg. 40c; ½-bu. bag 90c; 1 bu. bag $1.85; 5-bu. bag $2.35.

**ROSE FOOD**

G & O Rose Food—A well balanced, nutritious diet for Roses. Feed them the G & O way and your bushes will develop into something you really admire. Full directions with each package.

1 lb. 48c; 5 lbs. $1.35, postpaid; 10 lbs. $1.45; 25 lbs. $3.35, not postpaid.

**CLIMBERS**

Cl. Peace—Palest yellow flushed pink—like the bush Peace Rose, but a wonderful climbing plant. Will make a showplace of your garden. $2.25 each.

**The Outstanding ROSES of all Time**

All AARS Winners

**Patented Roses**

Mirandy—Deep rich red; fragrant, produces freely on strong, upright stems. One to be added to your rose collection. Price $2.50, postpaid.

Nocturne—Cardinal red, long, perfect buds, pleasing fragrance, blooms over a long season. Price $2.25, postpaid.

New Yorker—A red rose that stays red, upright growing and long blooming. Price $2.25, postpaid.

Peace—One of the most appealing roses ever introduced. Coppery pink in flats, intense brick red in the bloom. The rose is one of the softest yellow with pink edging. Price $2.75, postpaid.

Forty-Miner—Bi-color, yellow outside and bright red within. Fragrant. Price $2.75, postpaid.

Lowell Thomas—Lemon blooms, last very well, upright grower with lovely fragrance. Price $2.25, postpaid.

Mojave—One of the finest orange colored roses yet introduced, typical of a desert Susan, orange bloom with flame-like tones of scarlet and vermilion. Price $3.00.

Chrysler—Lively glowing crimson, with an abundance of rich perfume, beautiful in bud and open flower. Price $2.75.

Queen Elizabeth—AARS for 1955—Grandiflora. Glowing purple pink. Blooms will frequently occur singly on long almost thornless stems, even those occurring in clusters have long enough stems for cut flower use. Price $3.25.

Helein Trauvel—It is a blend of warm pink and orange with a bright undertone which makes the color sparkle. Long, exquisite buds. Price $2.75.

Circus—Multicolor Floribunda. $2.50 each.
